CIRCASSIANS RISE AGAINST THE TURK IN ANATOLIAN HILLS

Rebellion Spreads and Angora Is Likely to Be Faced With Grave Problem

By Special Cable MYTILENE, March 14-All is not MYTILENE, March 14—All is not JAPANESE REJECT Circassians, in the eastern part of Turks and the rebellion is spreading. As soon as the snows melt it is expected that the Angora Government will be faced with grave difficulties

apart from troubles springing from the attempt to define the trontiers of Turkey in Europe and to bring about peace in the Near East.

To these disturbances is added the problem of prisoners. Greece con-tinues immovable in its decision not to resume the exchange of prisoners as long as the Osmanli persist in expelling Greeks from the Pontus, and to all rumors to the contrary General Gonatas gives an emphatic denial. A civil prisoner who has just arrived here from Smyrna reports the re-lease of several hundred prisoners and Port Arthur.

from the Magnesia camp. Reprisals Planned

These prisoners were allowed to circulate freely about the country in search of food for themselves, but were forbidden to leave the shores of Anatolia. The remnants of the Chris-tian population are still being perse-cuted by the Turks.

Angora is contemplating taking effective measures of reprisal against the Greeks in Constantinople. The Turkish press says it regrets the Gov-ernment's action in granting permis-sion to Hellenes to remain and states that if the Greeks do not keep quiet and stay out of politics it will be easy to send them away. "In proportion as we do so," says one paper, "we shall gradually replace them in commercial and economic departments, without provoking a sudden crisis."

Autonomy Asked by Cyprus

The Greek papers state that the orthodox archbishop of Cyprus some time ago addressed a memorandum to the British Minister of Colonies requesting his Government to give Cyprus autonomy, which should serve as a preliminary step toward final union with the mother country. The Governor of Cyprus, in reply, has com-municated to the archbishop the de-cision by which the British Government declines to satisfy the request for autonomy, on the ground that the island enjoys extensive privileges of a most liberal character and further the British Government is not of the idea that Cyprus has arrived at such political maturity as to dispose of its

News from Athens indicate that the Greek Government intends to reconstitute the inquiry commission on the responsibilities for defeat in Asia Minor under the presidency of General Mazarakis, who will carry on his investigations exclusively from a mili-tary point of view. The intention to collect material for a genuine history of the national disaster.

NGORA. March 14 (By ciated Press)-One of the most laudable aims of the Nationalist régime n Turkey is to emancipate the Turkish women, who enjoy none of the freedom or privileges accorded other women of the world. The foremost exponents of women's rights in Turkey are Halliday Edibe Hanum, a iron graduate of the American Girls' College at Constantinople, and Mme. Kemal Pasha.

Halliday Edibe Hanum is already well known in the United States for ner work as head of the Angora Ministry of Education and for her advoof more rational customs affecting Moslem women. Two of her sons are students at Ann Arbor, Mich.

It is not likely that Turkish women will discard their black skirts and shawls and their impenetrable veils for the unconventional masculine attire of Mme. Kemal, but it is certain that her advent will modify or greatly curtail the restrictions and obsolete customs prescribed for the women of Turkey by Muhammad. Mme. Kemal insists that the rules of conduct and of the Muhammadan faith centuries ago are not tenable today, and she intends to inject some western customs into Turkish life.

GERMAN HOSTAGES PLACED ON ENGINES IN THE RUHR REGION

Attempt by France to Prevent Sabotage—Strike of 16,000 Coal Miners

ESSEN, March 14 (By The Asso ciated Press)—Sixteen thousand coal miners of the three government mines in the Recklinghausen district of the Ruhr are on strike in protest against the occupation of the state coke plant near Westerhold, according to German estimates today. The plant was seized yesterday by a party of engineers escorted by a battalion of French infantry. The French authorities express belief that the strike will last

German hostages were today for the first time placed on the locomotives of trains operated by the French and Belgians. This move was the outcome of repeated sabotage operations. The hostages so employed were in most cases burgomasters or other munici-pal officials of the various districts. Relays of them will ride on all trains both day and night.

The most serious case of sabotage reported today was the destruction over night of a section of railroad track near the Town of Steele, east

Belgium Desires to Force

Germany Into Surrender By SISLEY HUDDLESTON

By Special Cable

PARIS, March 14-The Brussels conference certainly appears to have cleared the air, though it is impossible to accept from this side what is represented to be the American official view that the Franco-Belgian agree ment about the progressive with-drawal from the Ruhr valley as Germany pays, is some kind of an invitanegotiations. Provided the German debt is fixed at a reasonable level there is no doubt, however, that the country will be given the opportunity of freeing itself of the forces of occu-

No illusions should be cherished concerning the possibility of media-tion, either on the part of the United States or England. It is true that British opinion is not content with neutrality, and there is a demand for intervention of one sort or other. If Mr. Bonar Law is pushed into premature action mischief will be caused. The first move must come from Franc

Replying to Calumnies

It was necessary to make a declara-tion on the object of the Ruhr operathe Chinese Trade and Labor Bureau, tions in order to put an end to the calto a representative of The Christian Science Monitor today. The 21 demands—it will be recalled for the purpose of being paid, but for that of obtaining security. Security has been the keyword for some weeks.

It is to be found in all responsible

The promise in vesterday's communiqué is, however, that the seizure is linked only with reparations. That is an excellent point made clear. Un derstand that it is the intention, when an agreement is reached, to withdraw remaining however at Essen. The original intention was merely to take possession of Essen, which commands the whole Ruhr valley, but the unwillingness of the Germans to co-operate compelled the extension. Now economic, military and political relations with China as to make it, with all its vast resources, tributary to Japan. will be conversations with England and Italy when the moment is ripe for the drawing up of a new reparations

No Bloc Against England

Just as the continental bloc against England melted into thin air, so has the other French proposal, supported chiefly by Pertinax, that England should be excluded from the negotiations, apparently collapsed. It would be a monstrous thing to leave out any war ally in the elaboration of a new scheme, or to rewrite the Versailles Treaty without the consent of the chief signatories.

Now the opinion is gaining ground that such non-participation is mere folly, and Belgium, whatever may be a certain French idea, would not con-sent to leaving out its former ally. This stage can only be reached when Germany capitulates completely. Le Temps goes so far as to insist that even if Germany made any overtures, it should not be listened to unless, and until, normal working on the Ruhr is assured.

The point is that if France shows that it cannot obtain anything from the Ruhr, then Germany will be able to boast a victory, and assert that France will be obliged to accept erms because it cannot get anything itself.

Therefore Germany's surrender must be manifested by the withdrawal of all orders which prevent the cooperation of the German population with France. Not until normal func tioning is restored should there be any talk between the two countries. This is an extreme view, which is not likely to be followed strictly. There is an objection both in Belgian and French circles to indicate to Germany in precise form, the allied position. It is however hinted that if the damages of there can be an all-round reasonable

understanding. Although Belgium is (Continued on Page 2, Column 4)

today. Count Skrzynski's arrival was simuldaily, Firestone 30,000 and Goodrich taneous with news received here of the resignation of the Lithuanian Cabiber companies is exceeding 100,000. Count Skrzynski's arrival was simulnet and the dissolution of the Lithuanian Parliament,

Besides Vilna, Poland gets Eastern Galicia, which practically satisfies all its remaining territorial aspirations that had not already been passed upon Mr. Galvanauskas, who has just resigned the Lithuanian Premiership, is on his way to Paris to sign the settle-ment giving Lithuania the port of on the Baltic, but it is anticipated the succeeding government at Kovno will raise objections attributing of Vilna to Poland

TIRE PRICE JUMP "WITHIN 10 DAYS"

Fabric Given as Cause AKRON, March 14 (United Press)-

Automobile tire prices must advance, nanufacturers declared today The increase cost of crude rubber and fabric will make tire prices from 714 to 15 per cent higher before April they predicted.

Heads of the Akron rubber plants are reticent about predicting in-creased tire prices. However, it is generally admitted that there general increase within the next

Hugh Allen, publicity director of the

Goodyear Tire and Rubber Company, said "An advance in tire prices is of the General Company, stated, "The advance in price of cotton fabric is one reason for the proposed raise."

E. S. Babcock, editor of the India Rubber Review, declared "it is a matter of fact with heads of the rubber industry that increases up to 15 per cent will be in effect soon."

Production in the tire industry, howthe definite delimitation of the frontier ever, is mounting steadily. Several rubber plants here are exceeding the output of the boom years of 1919 and

Goodyear is producing 30,300 tires

Alabama Schools Bar Lessons in Alcohol

Nontgomery, Ala., March 14

A LCOHOL doesn't exist—at least not so far as Alabama public school instruction is concerned. The State Board of Education eliminated a texthook in physiology because it contained an illustration of a still. This followed assertion by dry leaders that since the manufacture of liquor has been outlawed, children should not be told or shown how it was made.

close on April 3, touches in its course personalities and parties, prohibition and religion. No great issue of municipal policy divides the candi-

Various supporters of Arthur C. Lueder, former postmaster and Repub-lican candidate, see danger in putting into power in Chicago a party locally so wet that it has never supported an avowed dry for public office. During a recent campaign it was said at the Anti-Saloon League headquarters that no Democrat here had ever run for Congress, the Legislature or the city council with the backing of the Demo-cratic organization who had been willng to accept the indorsement of the

The Illinois division of the National Association Opposed to Prohibition is counting on the election of Judge Dever, the Democratic nominee. It is the hope of the organization to win

Back in the days when he was an alderman from a West Side ward—his chief opponents concede that he was "a good alderman from a "tough ward"—Judge Dever took a courageous stand on high license of saloons. It was a ward infested with courageous stand on high license of saloons. It was a ward infested with a lot of saloons, and when he first proke into the council was overrun mum of unfortunate consequences. broke into the council was overrun with saloon politicians, say those who recall those days. Alderman Dever voted for a \$1000 license. They in the ward, but he won his way back, farmers will no doubt be asked to

Lueder-Dever Forces Debating
Variety of Points as Drive for
Mayoralty Nears End

Special from Monitor Bureau
CHICAGO, March 14—The current of Chicago's mayoralty race, unleashed again this week to run swiftly to its close on April 3, touches in its course personalities and parties, prohibition and religion. No great issue of municipal policy divides the candi
william Z. Foster, charged with violating the State's law against syndicalism, will largely determine the place of Russian Communist philosophy in the United States in the immediate future. The fenets of Communism have already been raised in the selection of a jury was practically complete, with two women and 10 men provisionally seated. Selection will probably be finished today. Charges of "frame-up" are not likely to play any part in the defense, it now is known. Most of the farmers in this prosperous fruit belt, it is revealed by the questioning, had hardly heard of Communists until the secret national convention in the sand dunes near here last fall was raided. Even then local people paid little attention to their visitors, and this lack of interest is what has facilitated jury selection.

Times have changed since those days when most of the anti-syndicalism acts gan farmers serving as jury to try

Times have changed since those days when most of the anti-syndicalism acts were passed. The Communists are confident they will win a verdict which practically will repeal the Michigan statute and its sister laws. Nothing could better illustrate the change in atmosphere than the laughter in the courtroom toward the close of yester-day's session at some trivial witticism. Never once was there anything like that in the tritial in Chicago of the 90-odd members of the Industrial Workers of the World, herded between guards, nor during the bitter days of the other war-time trials of socialist chiefs.

Labor Not on Trial Here Mr. Foster, and a dozen other defendants, dine daily in the best hotel with the chief prosecutors for the State. As further contrast with

the hope of the organization to win modification through the Democratic Party. Get enough wet city Democrats in the next national convention and the country Democrats will be outvoted in writing a wet plank in the national platform is the theory.

But the Cook County democracy is of course as wet now as it will be in 1924, and the election of a Democratic mayor of Chicago would give it no more votes in a Democratic convention, only more prestige. The German-American Citizens League, organized for political action, has indorsed Judge Dever. Modification of prohibition is one of its main issues, but the league's officials state that other factors dictated its decision.

Judge Dever's Record

Back in the days when he was an alderman from a West Side ward—

are the state. As further contrast with the war-time procedure, the last 10 defendants of the 32 who surrendered on Saturday are free on their own recognizance. Furthermore, counsel from both sides yesterday agreed that this was not a prosecution of organized Labor.

The doctrine commonly associated with Communism that its policies entail a "class war," though not stressed by some party leaders, will probably be raised in the trial in view of the line of questioning already carried on by attorneys for both sides. Communists do not preach violence, adherent to come to pass, and this inevitability they declare is that the workers will eventually take over the state, the capitalist, a minority, will state, the capitalist, a minority.

state, the capitalist, a minority, will resist, and insurrection will follow. When this may come about they say they do not attempt to forecast, but point it out to train the workers

Documentary Evidence

This is all old doctrine, but its fresh Unfortunate as the raising of the "religious issue" may be regarded in politics, it has put in its appearance again in this campaign.

Mr. Lueder is the son of a Lutheran

minister and a Mason, while Judge
Dever is a member of the Knights of
Columbus. The prominence of the
school board in the campaign talk can
perhaps be traced in part to the sensitiveness on the question of church
affiliation.

The hegira among social workers
and women chiefs to Judge Dever is
explained in these circles as based for
the most part on personal acquaintance and warm approbation of his
public record, coupled with distrust of
political bosses and a reaction from
the Republican administration, now

of January, 1922:

Communists are not pacifists. They
are militants. They believe in establishing the dictatorship of the proletariat and maintaining it by force durism to Socialism; no silly reliance on
the ballot as the only weapon available
for the capture of political power; no
reliance on the all sufficiency of the
general strike. The real Communist
avails himself of every weapon to strike
a blow at capitalism but with the firm
conviction that the final onslaught on
the enemies' stronghold will be made
not with ballots but with bullets.

This theory of ultimate violence has been traced by Mr. Walsh in the courtroom back to Karl Marx. The So-clalist Party of America, however, repudiates it. At national Socialist headquarters in Chicago this week were fundamentally at variance with the Communists and that they rejected the idea of an armed uprising.

Communist Party Fading The Workers Party, which is to supplant the Communist Party, now rapidly going out of business, according to C. E. Ruthenberg, executive secretary of both parties, holds, exactly the same basic beliefs as the communist Party, Mr. Ruthenberg said yesterday. The Communist Party was secret. The Workers Party is designed to be above ground. The difference, Mr. Ruthenberg said, is in words and emphasis. The Workers Party that the same the investigation of the same said. stretches more the immediate objects of amalgamation of craft unions, better known as "One big unionism" and formation of a federated labor party he explained. While easing off on future predictions, however, he said its expectation of the future remains the

Who are these Communists? Mr. Ruthenberg, their directing head since the beginning, was a Cleveland business executive at one time. Well groomed, tall, strong, he looks like polished man of the world. During he hot days of the Chicago convention that formed the Communist party he never took off his blue serge coat in the stuffy hall.

Mrs. Rose Pastor Stokes' long squirrel coat attracts attention wherever she goes. Mrs. Ella Reeve Bloor, a woman of refined appearance, is the other unusual figure. Foster himself, neatly dressed, with high forehead and thin features, is not conspicuous. The rest of the Communist principals here

Members Turn Attention to National Election in Which Massachusetts Has Candidates

Gordon of Worcester elected state vice-regent by a vote of 219 against 62, Miss Josephine G. Richardson elected registrar and decision to build a \$60,000 dormitory for the America International College at Springfield, the state organization of D. A. R. closed its annual March conference held in Unity House, Boston, a little after today and will now give its attention to the election of officers at the thirty-second continental congress of the national organization to e held in Washington, D. C., be-

ginning April 16. husetts has three candidate for national office. Mrs. Franklin P. Shumway, honorary state regent, just retired, is candidate for corresponding secretary on the ticket of Mrs. Anthony Wayne Cook of Pennsylvania. Mrs. Larz Anderson is a candidate on the same ticket for librarian-general, nominated by a chapter in the District of Columbia. This morning Mrs. Chapter, Springfield, announced her candidacy for curator-general on the ticket of Mrs. William Cummings Storey, who is running for president-general. This was received in silence. The belief was afterward expressed that this is a political move to aid the election of Mrs. Cook, Mrs. Cum-mings and her ticket having no chance election, but running with the expectation of throwing the strength of their following to Mrs. Cook at the critcal moment. Mrs. G. Wallace W. Hanger of Washington, D. C., is the only other candidate for presidentgeneral, the contest being between her and Mrs. Cook.

The other officers elected by the Massachusetts association had no contestants and were as follows: Mrs Annie G. Eliot, chaplain; Mrs. Stephen P. Hurd, recording secretary; Miss Nancy H. Harris, corresponding secretary; Miss Julia Tyler Pevey treasurer; Mrs Arthur L. Power, his-torian; Mrs. William Moss Morgan, librarian; Mrs. Maitland L. Osborne custodian; Mrs. Harold C. Spencer

The decision to erect the dormitory is the result of a recommendation pre-sented last fall and discussed by local chapters since. Heretofore the Massa-

Reconstruction Going On

After reporting to headquarters, Mr. Smith returned to Minneapolis to make sure that the terms of the resolution are lived up to and to bring about reaffiliation on the part of the large number of local unions that had withdrawn in the face of the Red control. Minneapolis is undergoing a rapid reconstruction so far as the

trol. Minneapolis is undergoing a rapid reconstruction so far as the labor movement is concerned, and the federation believes that Foster has lost his strongest outpost.

The aggressive effort made in this

instance will be repeated in other localities where there has been any considerable amount of Foster activity. There are not more than one or two such cities, however, and in no case is there anything like the extent of revolutionary organization that existed in Minneapolis, it is explained.

LEARNING CARRIED INTO MOUNTAINS

Four Kentucky boys from an isolated mountain region where sturdy men and women of pure Anglo-Saxon descent are living in conditions approximating those of centuries ago are on their way to Boston and vicinity to tell New Englanders of the work being done at the Caney Creek Community Center at Pippa Pass, Ky., where they are students. At this center, children of the mountaineers are educated to become teachers and lead-

ers in work in their own hills.
Of the four boys making this year's trip, Corbett Franklin and Dan Martin were in Boston a year ago on a similar mission. They then addressed meetings at schoolhouses, clubs and churches telling of their isolated country and of their school center. This year the boys will travel from Springfield, Mass., which they will reach Thursday, to Boston, March 20, speaking one or twice a day at inter-

vening towns. They will be in Boston GERMAN HOSTAGES and vicinity for some days filling engagements. This year they will be di-

vided into two groups.
Six years ago Mrs. Alice S. G. Lloyd organized the center in the Kentucky Mountains, working as far as possible through existing institutions, particularly the schools, which she helped supply with books and other materials. The community center also trained teachers. County and outside help has With Mrs. George Minot Baker of Concord installed as state regent of the Massachusetts Daughters of the studying to be teachers. Each teacher equipped for his work than was the I. W. W's. attorney at Chicago and I. W. W's. attorney at Chicago and American Revolution, Miss Isabel W. Sent out is said to reach from 75 to Moreover allocated state 100 children in log schools.

ANTIQUE HOUSES

TO BE PRESERVED Acquisition of three important properties during the past year were re-ported at the annual meeting of the Society for the Preservation of New England Antiquities, held this afternoon in the Harrison Gray Otis House corner of Lynde and Cambridge streets, Boston. The Abraham Browne House at Watertown, Mass., came to the society as a gift. Built in 1663 it stands as one of the best restorations of a seventeenth century house in the country, being practically unchanged. The society has obtained the right of

succession to the Conant House at Townsend Harbor, Mass., now owned-by Mr. and Mrs. Charles M. Stow of ton. This is a fine country house of the central chimney type, built about 1720. It remains practically un-Joshua Brooks of Mercy Warren changed. The third house is a modern one in Litchfield, Conn., bequeathed to the society by Mary Perkins Quincy, a connection of the Massachusetts Quincys. With it came a \$20,000 endowment for the upkeep of the house

and grounds.

It will be known as the Quincy and school for domestic lace making. The house contains some valuable old furniture. It will be run by a joint committee from the New land Society and the Litchfield Historical Society.

The nominating committee recommended the election of the following officers: Board of trustees, 1923, president, Charles Knowles Bolton, Shirley, Mass; vice-presidents, Massa-chusetts, Miss Alice Longfellow, Cambridge; Waldo Lincoln, Worcester; Connecticut, Mrs. John Wallace Riddle, Farmington; Morgan B. Brainard, Hartford; Rhode Island, Mrs. Harold Brown, Newport; Henry D. Sharpe, Providence: New Hampshire, Miss Evelyn Sherburne, Portsmouth; Dr. Wallis D. Walker, Portsmouth; Vermont, Mrs. Horace Brown, Springfield; William B. C. Stickney, Bethel; Maine, Mrs. John F. Hill, Augusta; William D. Patterson, Wiscasset; treasurer, William C. Endicott, Danvers, Mass.; recording secretary, Albert Thorndike, Boston; corresponding secretary, Wil-Sumner Appleton, Boston; liam librarian. George Parker Winship, Dover, Mass.; director of museum, Philip L. Spalding, Milton, Mass.

Trustees for three years, Mrs. Henry H. Richardson, Brookline; Mrs. Ed mund S. Rousmaniere, Boston; Frank B. Bemis, Boston; Allan Forbes, Bos-

LEGISLATIVE FAVOR GIVEN "L" TUNNEL

Extension of the rapid transit system of the Boston Elevated Street Railway in Dorchester from Andrew Square terminal of the tunnel lines tem will to Field's Corner, is provided in a bill when conditions so warrant. reported favorably yesterday by the Committee on Street Railways and Railroads of the Massachusetts Legis lature.

The plan was first submitted to the Legislature 12 years ago by Charles U. Ufford of Dorchester. Under the bill now reported the project would cost about \$4,500,000, financed through March a bond issue of the City of Boston. A preliminary survey would be made by the Boston Transit Commission; and before work can be started, the plans would be subject to acceptance by the Boston City Council and Mayor, the Elevated and the New Haven road, over one of the branches of which the system would run.

WEATHER PREDICTIONS U. S. Weather Bureau Report

Roston and Vicinity: Fair and colder tonight: Thursday unsettled, probably followed by snow; moderate westerly winds, becoming variable.

Southern New England: Fair and colder tonight: Thursday increasing cloudiness, followed by snow Thursday night; diminishing northwest, shifting to east winds.

Northern New England: Fair tonight and probably Thursday; colder tonight; diminishing northwest winds, shifting to easterly Thursday.

Weather Outlook

Mostly fair weather will prevail in the Washington forecast district Wednesday, except that snow will probably continue in northern New England, but the weather will again become unsettled over a wide area Thursday under the influence of the western disturbance, which will move eastward during the next two days. The temperature will be lower in the Atlantic states Wednesday and it will not change materially in the eastern and southeastern states Thursday.

Official Temperatures

If I had two loaves of bread, I would sell one of them to buy

Copley Theater-Henry Jewett presents "The Reprobate." by Henry Afternoon and evening of March 13, 1923: first times in America. The cast:

Cubit. E. E. Clive
Mrs. Freshville. Jessamine Newcombe
Pitt Brunt, M. P. Gerald Rogers
Mr. Bonsor H. Conway Wingfield
Paul Doubleday Reginald Sheffield
Blanche Amber Catherine Willard
Mrs. Doubleday Dalsy Belmore
Capt. Chanter Charles Hampden

"A fantastic comedy of the manners of the 1880's," was the description in the program. Then "Charley's Aunt" is entitled to the same classification. This play might have been a comedy, if it had been written by a Milne of the 80s; or it might have been a good novel by Henry James. As it stands, it is pure farce, without one convincing character. Paul once had an escapade with a music-hall singer, which earned him the appellation of the title. Mrs. Doubleday and Mr. Bonsor, his joint guardians, have therefore placed him under kindergarten restrictions. Captain Chanter, engaged to Mrs. Doubleday, is another one-time admirer of Mrs. Freshville. Blanche is attracted to Paul by his reputation. Farcical complications ensue which result in mutually satisfactory pairings off.

MAYOR'S STREET PROJECT OPPOSED

Boston Real Estate Exchange Points Out Objections

Opposition to all of Mayor Curley's roposals for improving and w certain streets in the busine at a cost of \$18,500,000, and for the erection of a bridge across the Reserved channel, was offered today by representatives of the Boston Real Estate Exchange, save to the proposed widening of Cambridge Street.

The streets the Mayor would im-prove are Exchange, Province, Port-land, Tremont, Cambridge, Causeway, Chauncey, Summer and L streets, and

district, he thought, should be left undisturbed. Brokers and bankers would be inclined to move away, if the project were to be carried out. Municipal planners had always recognized, he said, that the financial district should be left a compact, self-contained unit. In New York for ex-

Recognizing the need of a thorough stone Street, around to the south of When Judge Dever first ran in his the Customs House via Commercial West Side ward," said one who knew Street, and thence west to Franklin, Chauncey Street and Harrison Avenue. This would leave the financial district intact instead of cutting right through

> He said that a traffic highway of 70 feet or more could be secured through streets where realty was cheap, and where the space was already wide enough so that enlargement would be

Henry Whitmore, president of the exchange, and Francis B. another member, also spoke in favor of the alternative plan. Mr. Whitmore said that the Mayor's plan to widen Province Street from School to West Street, was only part of a comprehensive plan that would result, if carried through to a logical end, in the de-struction of hotels and the disruption of the business district.

CLUB INSTITUTES TO BE WIDESPREAD

County organizations, club institutes and junior memberships are three phases of work interesting the Gen-eral Federation of Women's Clubs through its 50 state units and their respective districts, according to word received by local organizations today. On recommendation of the club president, Mrs. Thomas G. Winter, it is probable that club institutes will be established in the different states to train members in the ethics and effi-

ciency of their work. A committee to work on this idea includes: Mrs. W. H. Spaulding, Grin-nell, Ia., chairman; Mrs. Charles McDuffee, Alton, N. H. (New Hampshire has been having club institutes); Mrs. C. S. Selover, Cleveland, O.; Mrs. John Sherman, Chicago, Ill.

The movement, Mrs. Winter says, will At an executive session of the legisarranged to have the Boston office and lative Committee on Labor and Indus- club life into practical yet inspiring relation to each other. MEREDITH STATISTICS INDICATE

Ex-Secretary of Agriculture Says Rural "Ups and Downs'

DES MOINES, Ia., March 14—Iowa average. My reply to that is: Where tas been furnishing secretaries of griculture to the Federal Government for so many years, that it has been to be almost a habit of presients to tender that portfolio to an farmers' crops? has been furnishing secretaries of agriculture to the Federal Government for so many years, that it has come to be almost a habit of presidents to tender that portfolio to an lowan. The incumbent went to Washington from this city when his predecessor returned here to resume farm journal with a circulation close

E. T. Meredith, the former Secre-tary of Agriculture, has been making an intensive study of how the pros-perity of the farmers affects the cketbooks of soda-water clerks, tenographers, and others in the cities who very likely haven't the remotest idea what a farm looks like.

"It is trite to say that agriculture damental and that all business is based upon it, and yet the average man doesn't seem to stop to take that important fact into consideration at all," said Mr. Meredith, when I approached him for an interview on the So Mr. Meredith has started out to show, by charts, statistics, logic, and common sense, that agriculture is absolutely controlling in every busi-ness in the United States, and that the income from agriculture is regular not hit and miss, or spotted, through-out the year. The nub of Mr. Meredith's argument, of course, is to show dith's argument, of course, is to show that the prosperity which comes through agriculture is personal to each of us; consequently we all have a selfish interest in aiding the farmers to get prosperity.

Indirect Dependency

"When a soda-water clerk in New York was asked what interest he had in farmers, he gave the same answer as one of the biggest business men in the United States when he replied that hadn't any because he wasn't a farmer," continued Mr. Meredith by way of illustration. "Well, there was a stenographer in the building who came down every day to buy a soda, and if you asked her she would say, 'No, I work for a lawyer.' Go to the lawyer and he will say, 'I am not interested because I have only bankers for clients,' and the banker will an swer, 'I am not interested in agriculture because we have only steel people for clients; no farmer carries a de-posit with us.'

"If you put the question to the steel manufacturer he may reply, 'No, we manufacture only structural steel and don't sell to farmers.' Then you go to the purchaser of structural steel and ture?' and he replies heartily, 'I should say I am. I sell to farmers and I have just bought structural steel to build an addition to my plant.' So, if the farmer does not buy the binder or the automobile tire, then there is no structural steel sold, and no need for the banker in that case, or the lawyer who has the banker for a client, who will not need a stenographer, and so there will be no soda-water clerk."

Business for Every 275 Acres

Mr. Meredith has worked out an in-teresting chart which shows that from 1870, when there were 175,000,000 acres of improved land and 425,000 business houses in the United States, down to 1920, when the number of acres of improved land was 500,000,000 and the increase in these two branches of productive industry has been practically parallel. But, in 1870 it took 475 acres of improved land to support one business house and now there is a business concern of some kind for every 275 acres. "It ought to be easy to see that an added income to each farm affects very decidedly the busiouses in the United States, down to

the average return in dollars per acresince 1866 has been \$14. It also shows that the average of business failures in the same period has been 95 per year to each 1000. Using these two as a base line, Mr. Meredith has been able to show that commencing in 1868, following the period of unsettled curable to show that commencing in 1868, following the period of unsettled currency immediately after the Civil War, the ratio of crop returns to business

In the 20-year period, 1884 to 1904, the return to agriculture was always below the average and during that period failures were above the average. From 1915 to 1918 agriculture received increasing returns and business failures were constantly de-creasing, but in 1919 agriculture suffered a decline that continued through 1921, and at almost the exact point business failures began to in-crease and reached their peak in

"There are many conditions in between absolute failure and booming business," said Mr. Meredith, turning from his charts. "Some of those who did not fail were very hard up, some said business was slow, others only fair, so we do not have to experience absolute failure to see that agriculture affects business. But it seems to me that these charts do prove the controlling influence of agriculture. Some people say that if labor is employed you can sell your farm crops

Farm Products Increase

"The farmer takes from \$12,000,000,000, to \$15,000,000,000 out of the soil,
out of the pastures, out of the feed
lots every 12 months, and he walks him. Why shouldn't we take an in-

The Department of Agriculture estimates that the value of farm products them. City people who have access in 1922 was \$1,800,000,000 more than to editors and publishers of influenin 1922 was \$1,800,000,000 more than in the previous year. "In order to visualize what this increase will en'Why don't you help the farmer: why able the farmers to do," continued Mr. Meredith, "that total increase would his battles are not fought, and his give \$900 to each business con-battles, as I see it are our battles. give \$900 to each business con-cern in the United States, if it were Can't we taken a little more interest evenly distributed. It won't be, of course. But, a \$1 or \$2 increase in this fellow, this meal ticket of ours, if you like, and see that he gets a the farmer return per acre has a tremendous effect upon business, however small the fluctuation may be. That being the case, is it not significant that the farmers' \$1,800,000,000 crop increase last year means an increased return of \$3.60 per acre That would buy half the lumber in the United States and all the brick, tile,

lime, cement and glass put together.
"Business gets its prosperity from the farmer second-handed, or in many cases third, fourth or fifth-handed. The farmer gets the money (some-thing to trade) first and then decides to buy something from the rest of us. The trading value of his total determines our volume. To many his order is second or third-handed."

The Farmers' Income

Mr. Meredith insists that most city people have a wrong conception of how the farmer gets his income. They think that he gathers his crop once a year and sells it and does not have any income between. So the former Secretary of Agriculture has made up a table showing how the farmers receive their income in different groups of states. This table shows that for the whole United States the annual ncome of the farmers is divided into monthly installments ranging from 6 per cent to 12.6 per cent. In the middle west the monthly returns do not fluctuate as much as that.

"I can't see," continued Mr. Meredith, farmer has to spend. INTERESTS OF MAINE INDIANS ARE WATCHED IN LEGISLATURE

Representatives of Both Penobscot and Passamaquoddy Tribes Have Seat in Lower Branch

AUGUSTA, Me., March 14 (Special)
Proposed legislation affecting Maine's two tribes of Indians, the Penobscot and the Passamaquoddy, is now being considered by the Committee on Indian Affairs with the two Indian members of the Maine Legislature looking after the interests of their respective tribes. They occupy seals in the rear of the House of Representatives, but have no vote or voice in the Assembly, their legislative work being confined to presenting the claims of their tribes before the committee.

their legislative work being confined to presenting the claims of their tribes before the committee.

The present Indian representatives are James P. Lawis of the Penobscot tribe and Samuel J. Dana of the Passamaquoddy tribe. Back in the early days the Indian Representatives to the Legislature walked the entire distance from their reservations to the capital, and originally they came to the Legislature in paint and feathers, but now they are arrayed like the other members.

Both the present representatives saw service in the World War, Representative Dana in the army and Representative Lewis was one of the first to volunteer from Indian Island and he performed active service in the navy. He served from May 31, 1917, to Jan. 17, 1919, on the U. S. S. Oklahoma, getting some overseas duty. He is a member of the American Legion at Oldtown. He has lived on the Indian reservation for 31 years, and for the past 14 years has been a registered guide for fishing and hunting parties. He was chosen constable of the tribe for two years.

RHODE ISLAND HOUSE

PASSES 48-HOUR BILL

PROVIDENCE, R. I., March 14—
Passed by the House yesterday by a vote of 70 to 21, the Lavender Bill providing for a 45-hour working week for women and children was received by the special legislation Committee of the state Senate today. An amendment to the measure gives permission to employers and employees to enter into agreements to allow the 48 hours to be worked in five days. The passage of the bill was preceded by a three-hour, spirited debate.

The measure received the support of every Democrate member of the measure passes in the upper chamber gov. William S. Flynn, Democrat, will undoubtedly sign it. The enactment of such a law, if possible, was one of the planks of the Democratic platform last November.

WAGE ADVANCES DEMANDED HAVERHILL. Mass., March 14 (Specholary tribute) and the persentative plants of the planks of the Democratic platform last November.

LITHUANIAN ISSUE **REVERTS TO GENEVA**

Protest Against League of Nations Award Develops Into Attack on Polish Guards

By SISLEY HUDDLESTON

PARIS, Feb. 20 (Special Correspondence)-A pretty problem for the League of Nations bas arisen. It is well to realize that there is a chronic quarrel between Poland and Lithu-ania. Undoubtedly the Lithuanian Government connived at the seizing of Memel on which Poland had been looking with longing eyes, thus imitating the action of Poland in arranging the seizure of Vilna.

When fighting took place on the Lithuanian-Polish frontier a serious situation arose. Speaking of Memel, M. Poincaré informed the commission that the Lithuanian Government is dissatisfied with the conditional sovereignty which has just been accorded to it by the Conference of Ambassadors over the Memel territory. But the worst contention arises from the decision of the Council of the League of Nations to substitute a line of de-

Lithuania Protests

Mr. Sidzi-Kanskas, the Lithuanian delegate, entered a formal protest against this decision and declared that Lithuania would resist by every Poland to enter the neutral zone, and has, it would seem, made good its The Lithuanian Legation in Paris has issued a communiqué in which it is alleged that Polish forces invaded Lithuanian teritory and thus provoked a conflict. The Polish Minister in Paris, on the other hand, declares emphatically that Poland has unpleasant developments may be exdone no more than send a force of police and frontier guards into the section of the neutral zone accorded

to it by the decision of the League.

M. Viviani, who presided at t recent meeting of the Council of the League, warned Mr. Sidzi-Kanskas that If Lithuania defied the decision of the Council Article 16 of the Covenant would be invoked against it, and all the powers who are members of the League would break off commercial and financial relations with it. The Polish Legation in Paris declared that the accusation of the Lithuanian Government is in absolute contradiction to facts, and further states that the Lithuanian Government was informed of Poland's intention to occupy the as-

signed territory. Intervention by League Asked

The Lithuanian Government has telegraphed to Geneva requesting that the Council of the League of Nations should be immediately summoned to intervene in the dispute. The general secretary has asked for fuller informa-

There is an uneasy feeling here tha Germany and Russia stand behind Lithuania. M. Henri Lorin, Deputy of the Gironde, who has spent some time in Memel, writing in the Journal, says it would not be difficult to prove that the attack on Memel was prepared and encouraged in eastern Prussia. The Government of Moscow, says the Temps, has made it known at Kovno that it will consider Russia menaced as long as the Grodno-Vilna railway is completely in the hands of Poland In making this démarche the Soviet Covernment no doubt wishes to please By inciting Lithuania to Germany. from within his own party by H. M. Marler of Montreal, who advocated the admission of all healthy able-bodied immigrants, as necessary for the development of the country and the lowering of the burden of taxation.

The estimates for the forthcoming fiscal year were not advanced, and it is probable that the debate will continue for some days. Measures, in addition to the steps already taken for the repatriation of Canadians now resident in the United States, will be resident in the United States, will be advocated.

The World's Great Capitals

The Week in Paris

Paris, March 14
T IS impossible not to lay some emphasis on the rumors of a stirring throughout the smaller states of Middle Europe. They take their tone from France and, just as in private life those who are particularly in the public eye should be especially careful of their actions lest the should be imitated, so France, which is regarded as the leader of the con tinent, should have great regard to the moral effect of its proceedings upon other countries. Perhaps the upon other countries. Perhaps the very worse feature of the policy of the Ruhr is that it encourages the idea of force. It is as it were the exact opposite of the idea of the League of Nations, which would settle

all quarrels peaceably. are taught that in the modern world reliance should be principally place on force of arms, then the outlook for Europe as a whole would be exceed-ingly poor. Unfortunately this is what is happening. France has elevated into a doctrine the need of coercion in international affairs. It has used soldiers to collect what is due and with many to terms. France may be perfectly right. It may have received much provocation. But whether it is justified or not does not matter from justified or not does not matter from this point of view. One must consider the effect upon certain other European countries and that effect is alto gether deplorable. Perhaps enough attention has not been paid to this moral aspect and the fact that France's lead is likely to be followed.

From a most trustworthy source the writer is told that the financial situation of Hungary is such that the most pected if the Reparation Commission at Paris does not quickly act and permit the best use to be made of Hungarian resources. Sir William Goode went to Budapest to look into than had been imagined. -It became referred to the authorities at the pecome, like Austria, a possible charge on the great powers would seem to hang upon whatever decision is taken. The tragedy of Austria must not be repeated and there is grave danger that if there is not an early solution the mystic belief in the efficacy of occupation will extend eastward.

The serious operations which have at last begun for the completion of pupils of the Beaux-Arts, which occurs the Boulevard Haussman should soon after the competition in architecture give us a continuous boulevard from founded by Rougevin. For many days the Palace de l'Etoile to the Palace de la République. This will be one of the most remarkable streets in the chars which must parody the subject world. AMERICAN RESPECT FOR LAW ASSURES DRY CODE SUCCESS RUBBER'S BUOYANCY

Commerce Department Informed Mr. Haynes Says People Are Responding to Loyalty New Treatment Makes Practical Plea for Enforcement—To Be Issue in 1924

By FREDERIC WILLIAM WILE

WASHINGTON, March 15 — Roy
A. Haynes, Prohibition Commissioner,
has embarked upon a campaign to
"sell" law observance to the country.
He is absent from Washington this
week on such a mission. The immediate object of Mr. Haynes' trip
is to address a joint session of the
Michigan Legislature at Lansing. It
will be his fourth successive activity will be his fourth successive activity of that kind this year. On Jan. 19 he spoke before the joint assembly of Oregon at Salem; on Jan. 27, be-fore both branches of the state Legislature of Texas at Austin, and on Feb. 27 he addressed a joint session of his home state Legislature of Ohio

Everywhere and always the burden That recognition of Russia by the of Commissioner Haynes' song is the American Government at this time same. He tries to "sell" the men and women who make the laws of the federal states the idea that observance of the Eighteenth Amendment and the Volstead Act is incumbent and the voistead Act is incumbent upon every American who values his or her citizenship. Mr. Haynes reports that there is a ready "market" for the "goods" that he is "selling." He declares that reaction to the theory that violation of the liquor laws is unpatriotic is immense and amazing.

> New Light on Enforcement In an interview with this writer on

the eve of his departure for Ohio, the prohibition commissioner said: a report that a shipment of American cotton has been made to Russia by way of Germany, with German interests guaranteeing payment.

The statement by this authority on Russia not yet being ripe for sound investment was considered of importance, in view of the recent report from Moscow that Russia no longer needs food, but is in need of credits to rehabilitate its industries.

ELECTRIC HEATING FOR SCHOOLS WINNIPEG, Man., March 8 (Special Correspondence)—Winnipeg's 70 public schools may be heated by electricity in the near future. In formation bearing on the matter is being assembled by the authorities, and it is likely that the necessary apparatus will be installed within a short time.

NITROGEN GAS AIDS

Many Uses Where Resiliency

Special from Monitor Bureau LONDON, Feb. 15—An invention by which rubber is impregnated with nitrogen gas, thereby filling it with innumerable cells, seems destined shortly to take a big place in the rubber world. A representative of The Christian Science Monitor called at the onazote offices and was shown the new form of rubber under various aspects.

Is Required

proposition, but with the inauguration of a Governor determined to stamp out bootlegging, the Keystone State is destined to become a banner prohibition commonwealth.

Two States Lack Dry Codes

"Why are you concentrating on state legislatures?" the writer queried. He answered:

Because the second section of the Eighteenth Amendment provides that "The Congress and the several states shall have concurrent power to enforce this article by appropriate legislation."

Today only two states, Massachusetts and Rhode Island, are without local enforcement codes. But even in states which have domestic prohibition laws, I have found it useful to urge legislators to be unremitting in seeing that they are enforced. Always I use the law observance argument. There's nothing hectoring in asking an American citizen to remember his loyalty to the statutes under which he lives and thrives.

Mr. Haynes is persuaded that law observance will be among the foremost issues, if not the paramount issue, around which the 1924 presidential and congressional campaters will be jected to great strain or pressure, and congressional campaters will be jected to great strain or pressure, and congressional campaters will be jected to great strain or pressure, and Even in the hard state it can be subjected to great strain or pressure under heat will resume its original shape.

The Monitor representative asked as bition enforcement—enforcement of the existing statutes—will win the day. to its possible application to rubber roads. It was explained that this would seem to be quite practicable, as the hard and soft forms were shown apparently welded into a homogeneous whole, so that blocks with a resilient upper surface and solid base could be

It would also appear to have a future for motor car inner tubes. It is not claimed that it would take the place of air entirely, but a tube shaped mass would fill all the center of the tube with an air space between it and the tube, so that the wheel would still run on air, but if a puncture should occur the car could safely run on what would feel like a partially deflated tire.

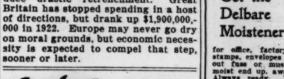

A section of an aluminum tube was

shown filled solid with hard onazote. It was explained that formulas had now been worked out, so that the amount of the substance in the soft state was known which would be required exactly to fill any given cubic space when hard. It will be realized what great additional strength this would give to tubing used in construc-

tional work.

Another striking test was the folding of a sheet about one-sixteenth of an inch thick several times; this was then squeezed as tightly as no able in a copying press, and on being held in front of a gas fire unfolded itself without leaving a mark on it.

Co-operation Urged

They may be depended on, Mr.

Haynes thinks, to vote bone dry in 1924. He says:

The prohibition unit's primary aim

in 1923 is to inculcate a sturdy law-observance and law-enforcement spirit in municipal, county and state officials throughout the country. It is the plain

intent of the Eighteenth Amendment that there should be that sort of co-operation between them and the federal authorities. If the reactions I experi-

ence are any criterion, local authorities

are going to have public opinion be-hind them in an everincreasing degree. The things men tell me when I'm among them point to that. The letters that reach me long after I get back to Wash-ington reaffirm it

Commissioner Haynes from time to

time receives striking proofs from

abroad that America's experiment in prohibition is attracting world-wide attention. If it succeeds, there is little doubt Uncle Sam's example in clambering on the water-wagon will prove contagious. Australia is watching with special interest. Many European countries have their even visited.

The Library

these reports and laws the library has a complete collection.

Here a teacher may compare the textbooks used by her great grandmother with those used by her pupils. The difference is marked. For instance there is great grandmother's selected at random from the 1922 report on the 57 important services small, the illustrations and text of a lugubrious nature. One finds "Among many other things suitable for young many other thing children, Dr. Watts and the Assembly's Catechisms." One can almost hear the five-year-old child, born in the early nve-year-old child, born in the early part of the nineteenth century, read-ing, "O that I could overtake the wings of time! O that I could recall the pleasures of my youth! for the days of my womanhood have been days of

In the primer of 1920, which is twice the size of the old one, with letters a third of an inch high and with heaviting the control of the con with beautifully colored illustrations, are such gems as "The Cat's Dinner."

See the cat. See the kittens. Come, cat, come. Come, kittens, come.

One of the most important services rendered by the library of the Bureau of Education is the compilation and distribution of up-to-date educational bibliographies in printed, mimeod and typewritten form. On request, a bibliography on almost any subject in the field can be supplied.

The collections are inadequately housed in a corner of that barn-like housed in a corner of that barn-like lamp must be an uninventoried pos-structure, the Pension Office. This session of the service. Casual state-office, by the way, maintains no ments convey much information as the office, by the way, maintains no library, but numbers its archives by the ton rather than by the folio.

The Geological Survey Library A mile or more from the Pension Office, in the imposing structure known as the "New Interior Building," the attractive quarters occupied by the library of the Geological Survey and the Bureau of Mines, are located on the first floor near one of the main entrances. The collection numbering entrances. The collection, numbering 190,000 volumes, about the same num ber of pamphlets, and 500 current pereign countries, has been built up primarily with a view to serving civil

and mining engineers.

RISES IN POLAND

Increase of 50 Per Cent in Month Ascribed to Fall of Mark

they justify the continual raising of prices for their articles.

The Diet has pessed a resolution appointing a special commissioner to deal with this form of speculation, and he appears to have begun his work energetically. The Government has the best intentions, but without the co-operation of the community it can do nothing. It is a good sign that a people's organization has been formed with the object of defending themselves against the profiteers. WARSAW, Peb. 15 (Special Correspondence)—Economic life in Poland is hampered by ever-increasing dearness. The Treasury has had to bor-row from the Polish Loan Bank, to

row from the Polish Loan Bank, to print new millions of bank notes, with the result that the growing inflation gives rise to the depreciation of Polish circulation bills, and in consequence a fresh fall of the mark in relation to foreign valutas and higher prices for all merchandise and food.

The Government is undertaking Treasury reform, but meanwhile prices increase from mouth to monthly and the commission of statistics showing the cost of living for an average family announces a rise of over 50 per cent for the month of January. One of the worst evils is a lowering of commercial ethics, causing the mercommercial ethics, causing the mer-chant class to regulate the price of their wares not by a constant scale but according to individual judgment based upon the rate of exchange of dollars or pounds sterling, and on this

Education in Love in Place of Fear

In view of the Chief Scout's approaching visit to America in April, these four articles on the subject of "Education in Love" from his pen, will have added interest. The remaining three articles will appear March 17, 21 and 24.

N A notable article in the Atlantic Monthly on "The Moral Equivalent for War," William James has rewhen the human race should devise for itself some substitute for war—training such as would make for peace, but without emasculating a nation and making it a herd of milk-sops and "so much human blubber." He says: "War's horrors are a cheap price to pay for rescue from the only alternative supposed. of a world of

alternative supposed, of a world of clerks and teachers of co-education and zoophily, of consumers' leagues, of industrialism unlimited, and femin-ism unabashed. No scorn, no hard-ness, no yalour any more! Fie upon such a cattle yard of a planet! . . Martial virtues must still be the en during cement, intrepidity, contempt of softness, surrender of private interests, obedience to command must still remain the rock upon which states

To Produce Manliness Without War Lessons from the fall of the Roman Empire downward have proved the strength of this argument. Certain modern nations retained conscription as much for educative as for war purposes, and to preserve their race from deterioration in its many qual-

Few will disagree with the feeling that manliness and character must be maintained, but the point is to devise a method by which it can be done apart from the training of men to war and bloodshed.

As a solution Mr. Jones suggests an idea which, besides inculcating hardihood and discipline, would give the idle rich their chance of learning manliness equally with the destitute poor; he would have conscription for the whole of the youth of the country to serve for a term of years not in the army but in coal and iron mines, on freight trains, aboard the fishing fleet in winter, at road building, tunnel making, and work in foundries and stoke holes, and on the frames

of sky scrapers, etc.

This is truly a hardening process for the pupils, though how far it would meet the employers' views in training the inept youth at his ex-

pense is another question. Physical Hardness Not Only Need

But physical hardness is not the only quality that is needed. These occupations, though they do give valuable results in hardening the individual and breaking down class differences, do not necessarily go far in character building, which is the urgent need in the education of the

Universal seamanship, with its discipline, pluck, resourcefulness, etc., together with its friendly interdourse with foreign peoples and the ease of its application, commends itself as a means in this direction, but unfortunately the amount of sea-going com-

A NEW IDEAL and a NEW IDEA Will You Help?

Do you appreciate in how far you are responsible for the high cost of living?

When you buy goods on credit you pay for it in the price of

The merchant cannot afford to charge goods unless he is com-pensated for the maintenance of a costly credit and collection system as well as the interest on these charges. Who do you suppose compensates the merchant for these? You do, of course, in the increased price you pay for his goods,

NOR DOES THIS TELL THE WHOLE STORY. The merchant who sells "on time" in turn buys his goods "on time." He must compensate the wholesaler in the price he pays him for his slow payers and bad accounts and so it is that "charge accounts" are the cause of mounting costs from hand to hand.

The store will carry a complete line of High Grade Suits, Coats, Dresses, Millinery, Shoes, Lingerie, Hosiery, Blouses, Sweaters, Bags and Novelty Jewelry. The styles are the latest-the quality is of the highest-the price

Let your motto be "Buy for cash and do better at Herman's." When our delivery wagon stops at your neighbor's door, you may know that they are paying cash—that they realize the wisdom of so

doing.
Will you also help cut the high cost of living?

Milwaukee

Wisconsin

Fear Still Usurps We desire Peace and so we prepare for war, fearing lest the enemy should attack us; we preach peace because we fear the horrors of war. In our governments we largely use class rep- DESTITUTE RUSSIANS resentation because we fear the legis-

resentation because we fear the legislation of some other class. We are moral to a great extent because we fear the consequences, whether legal or sentimental, of being found out.

The fear of poverty impels us to earn money. Fear of God, in place of love of God, makes some people moral, though it means that superstition has taken the place of faith. The so-called discipline of an army or navy is largely gained through fear or navy is largely gained through fear of punishment. Education has in the past been conducted in its early stages much on the same lines. Fear has been the weapon of the powerful in terrorizing the weaker.

in terrorizing the weaker.

Christians when they pray use what is termed the Lord's Prayer. I believe that historically this prayer existed before the time of Jesus and was used by various forms of religions, so that the wish expressed in it to "Our Father" that "His kingdom may come and His will be done on earth" is very widespread among the peoples, including those of non-Christian beliefs.

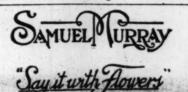

Man Able to Make Peace

Man Able to Make Peace Can we not, in addition to praying passively for the reign of Love, do something to help actively in bringing it about? I believe that we can. As the Rev. Alfred Wishart says "Man is largely responsible for social life, and if that life breeds war, poverty, crime and disease, it is man's duty to remedy these evils that breed

human misery.
"But there is very little recognition of responsibility by the real agents of human wrong, because the world

NEW METHODS USED IN TEACHING MUSIC

pon God for conditions of life for which man is really responsible deceives men and postpones the adoption of proper remedies."

Rober Colors and postpones the adoption of proper remedies."

NEW YORK, March 14—New and improved methods of teaching music in New York were demonstrated at a concert given by the seven music school settlements of Manhattan at Acolian Hall last night. The first principle of the new system is rhythm. The plane and violin are no longer taught as they were 200 years ago. Now three months or more are given to the study of reythm before the children touch the instruments. Through different physical exercises they learn about time, and they must feel music before they try to play it. The demonstration of "rhythmetics" given by the pupils of the Greenwich House Music School proved one of the most interesting features of the program.

WOOL PRICES ARE SOMEWHAT LOWER

The persisting duliness in the American wool market is having the usual effect of lowering prices. In the case of good worsted wools, the decline has not been very marked yet, possibly 2 or 3 cents a pound on the clean basis, but in the case of scoured wools and other wools suitable for the use of the woolen manufacturers the decline has been greater, amounting frequently to 5 or 6 cents on good fine white and carbonized wools.

Thus, choice white Colonial so the case of the wools are available in the case of the wools.

Thus, choice white Colonial so the wools are available in the case of the wools.

Thus, choice white Colonial so the case of the wools are available in th

ing 64@70s combing wools of the Malbourne type, which last week were selling at \$1.20 or slightly better, are now bringing about \$1.18, clean basis, in bond. The small quantities of fine staple domestic wool available, also are on a slightly lower basis, fairly good Ohio delaines having been offered at 56 cents, which means a decline of

about 1 cent a pound.

Thus, the influence of a quiet market, even in the face of short supplies of really desirable wool, is apparent and that despite a thoroughly desirable state of affairs in the market for

the manufactured product. Buying Power Still Strong

All reports from the goods markets agree that the season thus far has been a very successful one and that the buying power as reflected by the manufacturing clothiers is very strong. Indeed, it is evident that the country is sufficiently prosperous so that the demand for cloth is tending more to the finer qualities again, in spite of the fact that fine wools are carce and relatively dear. Spinners and topmakers report comparatively little new business but they are fairly well engaged on old contracts. Prices

The foreign markets showed a slight rallying tendency last week. London, which opened last week fully on a parity with the rates prevailing in the Liverpool colonial auctions the week previous, resumed on Monday with prices if anything a bit firmer. Yes terday found the market very active and prices exceedingly firm all along the line, which condition of the mar-ket may be expected to continue dur-ing the remainder of the series which

In view of the announcement to the In view of the announcement to the effect that the Liverpool colonial series scheduled to open April 19 have been postponed until May, it is evident the governors of the sales have come to the conclusion that the wool trade is well enough supplied with wool, so that the best results can hardly be attained by forcing supplies upon the market too heavily at the present time.

resent time.
A better tone has been in evidence in Australia this week, Melbourne, although quiet, being firmer than it was last week, while Sydney has been very firm on the basis of prices named a week ago, with America taking good wools where available on the lower

level of rates recently established. Japan is buying moderately of the better wools and France is taking the though England has been rather an indifferent buyer. Only a few hundred bales of really good wool are left in the South African markets, and so far as the South American markets are concerned the good bright wools are practically cleared, with desirable wools now coming from the south and moving steadily.

Arizona Prices Higher

The improved tone at London since the opening and the firmer opening than was expected, along with an im-proved state of affairs in the primary markets, is having a strengthening effect upon the market in Bradford, where the combers have adopted a firmer attitude on the price of tops. Good warp 64s are hardly to be had today under 60d. and some extra choice Capes have been sold within the week on the basis of 63d. The Bradford trade, evidently, is more confident as to the position of the market than it has been for some

News from Arizona this morning is to the effect that contracting has been resumed there with higher prices hav-ing been paid in the vicinity of Phoenix than any prices previously paid. Good wool of fairly even grade and staple of fine and fine medium quality has been sold there this week at 52 cents in the grease, or possibly a little

more money.

Hitherto for two or three weeks, buying in the west has been very quiet and little has been done, except for the purchase of some fed sheep's wool now and again at good full prices although not above the parity of the east or of other previous western pur-chases. Thus, some half-blood and finer Wyoming wool is reported to have been purchased at 50 cents for *Cents a thousand

wool of very light shrinkage, say of per cent, which came from the Kansas City yards.

The latest advices from Arisona have been a bit disquieting, however, apparently indicating the possibility that the market in the west might get a high start which might result rather disastrously in the end for the later buyers.

amounting frequently to 5 or 6 cents on good fine white and carbonized wools.

Thus, choice white Colonial scoured Cape wools are available in the market at \$1.15, asked, and fine carbonized California wools which could not be bought a week ago under \$1.25 or \$1.26 can now be purchased for \$1.18 or less.

The decline in fine staple wools, suitable for the worsted mill trade, has been very much less, good combing 64@70s combing wools of the loss combing 64@70s combing wools of the last few days to send out the attitude of the New England trade. Since the close of the war and the return of Lorraine to France, that nation has a great excess of iron and can offer other nations wast quantities of all grades.

New England offers the best market of any one section of the United States

of any one section of the United States for imported iron, because its foun-dries are located the greatest distance from the source of supply of domestic raw material. With iron and coal production in Europe normal, it is be-lieved that iron can be brought in from Europe at lower cost, partially owing to the high domestic railroad freight rates. For illustration, a foundry in Massachusetts can buy Pennsylvania pig iron for \$32.50@33 delivered. That same iron could be bought by a Pennsylvania foundry at least \$3 lower. Ocean rates are the same to all north Atlantic seaports, so imported iron sent to Boston or Portland costs no more than if it were sent further south, where the rail rates from producing centers of this country were less than to New Eng-

Mr. Fere received the assurances of some of the leading factors in the New England market that considerable French iron would be bought here provided that the analysis was as guaranteed, prices within a reasonable distance of domestic iron values and a supply of spot iron maintained near by for quick shipment.

National Simbroco 8% Preferred

Cumulative and Participating

While it seems to be the opinion that the activity in building is to continue, it is a fact that the 3% Preferred Dividend of the Corporation has been earned during building depression as well. In fact the dividend on this stock has never been passed. The next dividend will be paid April 1 to holders of Preferred Stock pur-chased before March 20.

The National Simbroco Corporation will use the proceeds from the sale of this 8% cumulative, participating preferred stock, to establish units in other building centers in which to make Simbroco Cast Concrete Stone to meet the demand coming from points which cannot be supplied from the parent plant in Boston.

A special circular upon request.

Lawrence D. Tyson

AWRENCE DAVIS TYSON, of Knoxville, Tenn., head of a number of southern cotton mills, is one who has been instrumental in bringing the south to the fore as a textile manufacturing center. He was a soldier in the World War, having commanded the fifty-ninth infantry brigade of the thirtieth, or Old Hickory division, throughout the war.

General Tyson is a native of Greenville, Pitt County, N. C. He entered the United States Military Academy at West Point in 1883, and four years later was commissioned a second lieutenant, going with the ninth infantry. He was at various posts until 1891, when he was assigned to the University of Tennessee at Knoxville, as professor of military tactics, remaining there

While at the university, he became a student in the law class and graduated a Bachelor of Laws. He was admitted to practice with the Tennessee bar in 1895, and resigned from the army the next year. In the Spanish-American War he was colonel of the Sixth United States Volunteers, serving in Porto Rico.

For a quarter of a century he has been identified with the politics of the State. He was Speaker of the House of the Tennessee General Assembly in 1905; a candidate of the Democrats for the United States senatorship in the 1913 Legislature, and a candidate for nomination for the vicesidency at the San Francisco Democratic national convention in 1920.

During the World War General Tyson served as brigadier-general, United States Army, having first been appointed brigadier-general of the Tennessee National Guard by Gov. Tom C. Rye, in July, 1917. His brigade took a prominent part in the breaking of the Hindenburg line in September, 1918. The thirtieth division, and Tyson's brigade, were in the "break-through" at Bellecourt. He was awarded the Distinguished Service Medal.

through" at Bellecourt, He was awarded the Distinguished Service Medal. His main business activities have been connected with textile mill operation and development. He has organized many industrial corporations, including the Knoxville Cotton Mills, Knoxville Spinning Mills, and Tennessee Mills, of all of which he is president.

He is largely interested in coal and iron development, and is president of the Poplar Creek Coal & Iron Company, of the East Tennessee Coal & Iron Company, the East Tennessee Land Company, the Southern Valve Gear Company; vice-president of the Roane Iron Company, the largest producer in Tennessee, vice-president of the Cambria Coal Mining pig-iron producer in Tennessee; vice-president of the Cambria Coal Mining Company, and of the Coal Creek Mining & Manufacturing Company; a direc-

ior of two banks and several other corporations.

He was president of the American Cotton Manufacturers' Association, May, 1921, to May, 1922, and his chief contributions to industry, from a national standpoint, were made during his term of office with this organization. He is a strong exponent of the practicability of the south as the center of textile manufacture of the Nation.

AUSTRIAN BANK **DEPOSITS SHOW BIG INCREASE**

LONDON, March 2 (Special Correspondence)—The London Office of the League of Nations announces that, according to the returns received by Dr. Zimmerman, the Commissioner General of the League of Nations in

the rehabilitation of Austria first began to be seen, this is the largest increase in the deposits that has occurred, the figures being 13,000,000,000 for October, 22,000,000,000 for November, and 28,000,000,000 for December. By Jan. 31, these deposits totaled 124,500,000,000 paper crowns.

The exchange value of the crown has remained practically stationary throughout the period and though the total amount involved is small—about £500,000—the progressive increases denote a gradual improvement in the financial condition of the country.

REPUBLIC RAILWAY & LIGHT Republic Railway & Light Company reports for 1922, gross earnings of \$8,125,791, compared with \$7,821,679 in 1921 and a balance for depreciation, dividends and surplus of \$422,151, compared with \$347,992 in the preceding year.

DUTCH SHIPPING SHOWS STEADY **IMPROVEMENT**

THE HAGUE, March 2 (Special Correspondence)—The number of ships lying idle in the port of Amsterdam is decreasing. On Dec. 31, 1922, there were 26 inactive ships representing

General of the League of Nations in Vienna, the deposits in the Austrian banks and savings banks during January have increased by a further 35,500,000,000 paper crowns.

Since September, when the effects of the League of Nations' scheme for the rehabilitation of Austria first began to be seen, this is the largest bring saltpeter.

The Insulinde oil factories still have two ships out of use, representing 14,600 tons; the Royal Dutch Lloyd. one ship of 3800 tons; the Steamship Company Noordzee, two small ships representing 1500 tons, and the Royal Netherlands Steamship Company, two boats representing 1400 tons.

COTTON CONSUMED **DURING FEBRUARY**

WASHINGTON, March 14-Cotton consumed during February totaled 566,-924 bales of lint and 47,611 of linters compared with 610,375 of lint and 49,-804 of linters in January this year and 472,336 of lint and 42,742 of linters in February, last year, the Census Bu-reau announced today.

CUSTOMS RULINGS

NEW YORK, March 14 (Special)-ecisions by the Board of United States eneral Appraisers, just rendered, resee the tariff rate on wrist watches ported by Tiffany & Co. and the ean Watch & Clock Company European Watch & Clock Company. The watches in question, of gold and platinum, with bracelets of leather and silk, having gold snaps or buckles, and with bracelets of platinum, ornamented with precious stones, were assessed, the movements at 30 per cent ad valorem under paragraph 161 and the cases and bracelets at 60 per cent under paragraph 356 of the 1913 law, as jewelry. The board finds that the movements were properly assessed; that the cases should have been assessed at 30 per cent under paragraph 161 and that the brace-iets should have paid duty at the rate of only 50 per cent under paragraph 167.

The tariff is reduced on metal mil-

of only 50 per cent under paragraph 167.

The tariff is reduced on metal millinery ornaments in a decision sustaining a protest of the Rosenthal Sloan Millinery Company of St. Louis. The articles in question were taxed at the rate of 50 per cent ad valorem under paragraph 167, 1813 act, as articles or wares plated with gold. The importers contended that duty should have been assessed at the rate of only 20 per cent ad valorem under the provision in the same paragraph for manufactures of metal not plated with gold de silver. This claim of the importers is upheld. German-made safety razors and separate blades therefor were the subject of a ruling by the customs board sustaining a protest of the International Forwarding Company of Chicago. Duty was levied on these razors and blades at the rate of 55 per cent ad valorem under paragraph 128, tariff act of 1913. The board now finds that the rate should have been only 35 per cent under the same paragraph as razors and parts of razors valued at less than \$1 a dozen.

YADKIN RIVER POWER

PACKER HIDES MARKET DULL BUT

PRICES ARE FIRM

Quality Available Rather Poor and Tanners Wait for Lower Quotations

Reported sales of packer hides for the week ended March 10 were inside the 5000 mark. Rumors of a confidential deal were en the market but could not be confirmed.

There was quite a call for branded stock, heavy weights particularly. Offers are being turned down as the supply is not burdensome, even though they were far the poorest stock of the year.

York.
Country hides are in small demand but prices are steady, the heavy hides alone being of any interest to the buyers. Calf skins are dull and easy, top grades of Chicago cities going at 17½ cents.

Deductions are that prices on Feb-

ruary-March packer hides must break as it is nearing the time to rid the packs of them. The low supply favors the packers somewhat, so at best the drop cannot be expected to amount to

Actual sales of hides reported in the packer market for the week ended March 10 were as follows: Yr. ago 2500 Nov ex-light native cows.15%c 12½c 1000 Feb light native steers...15c 11½c

FREEPORT-TEXAS SHOWING FOR 1923 SLIGHTLY BETTER

The Presport Texas Compathe year ended Nov. 30, 1922, a deficit of \$253,495, after taxes, depreciation and expense pared with a deficit of \$452,425 previous year:

BUILDING BOOM UNPRECEDENTED

Offers are being turned down as the supply is not burdensome, even though they were far the poorest stock of the year.

One prominent tanner offered for a sizeable lot of buttbranded and Texas steers 17 cents, and another lot of Colorado and light Texas steers 16 cents, but neither price was good enough to obtain either lot.

The moderate amount of available hides on the market is remarkable, considering their objectionable features, but even so buyers are not very confident that there will be much of a slump in quotations before a clean up bid is made.

Rative heavy steers and cows are slow of sale, because 19 cents and 18 cents are the asking prices. Ordinary amounts of January-February-March native cows are quoted at 15%, but as concessions are being expected later, tanners went on the waiting list.

South American Frigorifico hides were active all the week, and sizeable lots changed hands at 23½ cents with cows bringing 16½ cents, c. a. f. New York.

Country hides are in small demand,

Solid **Foundations**

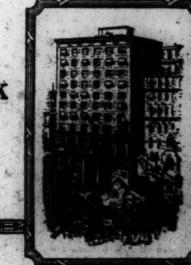

CTABILITY in an institution, as in a building, requires a solid foundation.

That the creators of this bank built on foundations fundamentally sound, is evidenced by a continued growth of more than 130 years, through eras of prosperity and in spite of panics and periods of stress. In a rigid adherence to those sound fundamentals we are building for the future—for our success and that of our customers.

Can we be of service to you?

National Union Bank

Largest Business in History-Operating Profit \$10,000,000 -Financial Condition Good

The annual report of the American Sugar Refining Company for 1922, issued today, shows a tremendous improvement over 1921, both as regards earnings and balance sheet. The operating profits were \$10,083,832, and earnings from all sources were \$11,-

After deducting depreciation and interest and preferred dividends, the balance of \$5,404,787, which would have gone to swell surplus and would be equivalent to \$12.01 a share on the \$45,000,000 common stock, was practically offset by a deduction from surplus of \$5,358,145, representing losses on 1920 contracts.

Surplus Almost Unchanged

There was, therefore, little change in corporate surplus, which on Dec. 31, 1922, stood at \$7,201,131, a gain of only \$46,641. The sundry reserves of the company, which totaled \$21,855,-541 the year previous, was reduced to \$20,152,354, the difference representing a loss of a \$1,000,000 loan of the Iowa Sugar Company and various adjust-

ments of 1920 contracts. The company is amply provided with cash, this item, as of the end of the year, being \$6,012,380, while receivables and acceptances totaled \$10, 439,368. The proceeds of the \$30,-000,000 bond issue were received Jan. 6, 1922, and enabled the payment of all bank loans. On Dec. 31 last, therefore, American Sugar was without payables, except current accounts and

Volume of Business

The annual report says, in part: The total business of the company amounted to \$192,000,000. Meltings of 1,650,000 tons of raw sugar were the largest in the history of the company. The record volume of business is attributed to low sugar prices large fruit

uted to low sugar prices, large fruit crops and export business. At the end of 1921 Cuba had a carryover into the new year of about 1,250,-000 tons of sugar. The American and National Sugar Refining Companies organized the Sugar Export Corporation under the Webb Act for the purpose of distributing throughout the world as much as possible of this misplaced ton-All Cuban producers and all United States refiners engaged in the export trade were invited to participate. The plan was so successful that in less than half a year's time the excess carry-over was absorbed abroad and the Sugar Export Corporation ceased further com-

Last Year's Exports

The United States in 1922 exported 819,964 tons of sugar to 83 foreign countries. In 1920 there had been imported into the United States 885,868 tons, from nearly 50 countries.

The refiners and Cuban producers not

y moved Cuba's carry-over, as large the domestic beet and Louisiana

as the domestic best and Louisiana cane sugar crops, or the crops of Porto Rico, Hawaii, and the Philippines combined, but at the same time absorbed a new Cuban crop of record size.

The key to the future continues to be the ability of the industry to hold foreign markets. Sugar refineries already built in the United States are more than sufficient to refine enough. than sufficient to refine enough sugar for this country and also all the export sugar Cuba can produce for

years to come.

Not only does this export business provide an outlet for Cuba's increased production, but it is also of great benefit to domestic consumers in that it provides an additional volume of business making for lower refining costs, steadler cargo movements from the tropics, in-creased employment of labor and the many benefits incidental to continuou

Expansion Program

The building of the Baltimore Refinery was the largest construction undertaking in progress in the country during the years 1920 and 1921, as was Central Jaronu the largest undertaking in Cuba at any time. Both enterprises were carried through unmodified and on schedule time. The stockholders now have the advantage of the earning power of both.

The new tariff amounts to 2 cents a

The company has 27,288 stockholders, about one-half of whom are women. The average holding is 33 shares.

STUDEBAKER TO BUILD PLANT CHICAGO, March 14—A special dispatch from South Bend says Stude-baker Corporation has taken out a permit for the erection of another factory hullding to cost \$1011,000

building, to cost \$1,011,000. CENTRAL DIVIDEND POSTPONED NEW YORK, March 14—New York Central directors decided to take no action on the dividend due May 1 until a full meeting of the board could be

CORN PRODUCTS ANTICIPATING GOOD BUSINESS

The Corn Products Refining Company is now running at approximately 60 per cent of capacity and the Kansas City plant is closed down. The Due in Part to Depreciation of package business is running along at a good rate and the drop in production, which has been in force for several months, is principally due to the falling off of the export business.

Earnings for the quarter are expected to be about equal to those of the corresponding period of 1922, when \$3.47 a share on the \$49,784,000 com-

mon stock was earned.

This is apparently a considerable decrease from the figures for the last quarter of 1922, when \$6.85 was shown for the junior issue, but it should be remembered that quarterly earnings are largely approximate. Since such items as the distribution of overhead must be estimated and many adjust-ments deferred until the year's figures are in, it always happens that the last quarter falls heir to a considerable and the scarcity of coal in the amount of earnings really accumulated

earlier in the year. Corn Products is building a large factory in Germany and expects to finabout the first of next year, but is being held up through inability to get machinery from the Ruhr. It will probably be ready when needed.

There is nothing in the raw materials situation to indicate that the company will make, in 1923, less money than it did in 1922.

Rising sugar prices have stimulated demand for corn sugar, comprising say 5 per cent of the company's ton-nage, and it is selling all it can make. The strength of the sugar situation will mean increased sales in some lines, although the largest part of Corn Product's income is derived from lines which do not compete with sugar in

sugar drafts, which latter item PROSPEROUS YEAR amounted to \$4,290,000. FOR NEW ENGLAND

CONFECTIONERY CO. The New England Confectionery

Company obtained very satisfactory results for 1922. Final figures are not available but will show dividends earned by a comfortable margin. A 25 per cent stock dividend was declared and paid in December. Be-

sides this, regular dividends of 12 per cent, plus extras of 8 per cent were Factory production during 1922 was

the largest in the company's history, exceeding the best previous year by nearly 10 per cent. The outlook for the current year seems favorable, although the unsettled condition of the sugar market is at present a disturbing factor. "Necco" uses 100,000 barrels of sugar a year. The company turned the year with the smallest inventory in years.

The resignation of President Frank E. Clark at the annual meeting last week made necessary a complete readjustment of officers. Fred R. Havward, former vice-president, was elected to fill the vacancy, while second vice-president Horace S. Ridley will suceed Mr. Hayward. Factory manager Harry C. Achorn was elected second vice-president. J. Karl Mason was made treasurer and added to the board, succeeding Charles A. Mayo.
The consolidated balance sheet as of Dec. 31, 1922, after giving effect to

on schedule time. The stockholders now have the advantage of the earning power of both.

The new tariff amounts to 2 cents a pound on each pound of refined sugar, and this fact should always be remembered in considering sugar prices. The company paid the Government in 1922 on its imports of raw sugar the sum of \$48,000,000.

Since the stock purchasing plan was inaugurated in 1919, employees have purchased 13,684 shares, having a total par value of \$1,368,400.

The company has 27,288 stockholders, about one-half of whom are women. The average holding is 33 shares.

COST OF LIVING IN FRANCE LIKELY TO MOVE UPWARD

published indexes of the Statistique on the issue, Générale de la France, wholesale prices have shown a tendency to rise considerably since the first of the year, the increase applying to manufactured goods as well as foodstuffs.

the stock dividend, follows with com-

of record March 23, and the requirement of the months ago when the stability of the months ago when the stability of the months ago when the stability of the franc began to waver as a result of the announcement of the deficit in the linders, as well as the failure of the inter-allied conferences on reparations, and the erroneous forecasts made concerning the wheat crop. "During the autumn and the first months of the winter, the upward movement of these wholesale prices was slow, varying only with the rate of exchange. To be sure this rise gave an impetus to business activities as the classic law comes into play at such a time which creates a greater than the stability of the definition of the winter, the upward so when the stability of the rate of the stability of the exchange. To be sure this rise gave an impetus to business activities, as the classic law comes into play at such a time which creates a greater of the stability of the stable of the st cal tendencies may be, and help those who hold the responsible posts to solve this difficult problem."

FORD AS CREDIT EXPERT OTTAWA, Ont., March 14—Henry Ford is scheduled to appear before the House of Commons committee on bank-House of Commons committee on banking and commerce to give evidence on
the functions of Canadian credit. His
name was among those submitted by
William Irvine, M. P., for East Calgary, who is demanding radical reform
in the credit and banking system.

DIVIDENDS

Western Union Telegraph Company de-clared the regular quarterly dividend of 1% per cent, payable April 18 to stock of record March 24.

Due in Part to Depreciation of Franc and the Coal

Scarcity

PARIS, Feb. 27 (Special Correspondence)—According to the latest published indexes of the Statistique for the precipation of the precipation of

Ashville Power & Light Company de-clared the regular quarterly dividend of 1½ per cent on the preferred stock pay-able April 2 to stock of record March 16. Cincinnati Street Railway Company de-clared the regular quarterly dividend of 1½ per cent, payable April 1 to stock of record March 16.

car, the increase applying to manuactured goods as well as foodstuffs. This would seem to be a foreunner to a general increase in the ost of living, as retail prices are sound to follow in the wake of their wholesale brothers. It is fair to assume that this condition is due in art to the depreciation of the francing in the country.

Retail Prices Climb

Some retail prices have, in fact, already begun to climb, but they are not doing so as rapidly as the wholesale ones.

The Ruhr operation and the fluctuating exchange are contributing factors to a more or less uncertain economic situation, which does not seem to ameliorate itself from day to day. The Parls press asks for patience and time with respect to the Ruhr. Nevertheless there is a growing apprehension in certain quarters as to the wishom of the undertaking.

M. Lucien Romier, the editor-inchief of the Journée Industrielle, sums up the situation in an interesting editorial which has just been published. He begins by asserting that the outstanding economic fact of interest for these past weeks has been the very marked tendency of wholesale prices to rise.

French Editor's Viewpoint

"This rise," says M. Romier, "does not datb from yesterday. It began to manifest itself about seven or eight months ago when the stability of the franc began to waver as a result of the announcement of the deficit in the Budget, as well as the failure of the

LONDON QUOTATIONS

LONDON, March 14—Consols for money were 58%, Grand Trunk %, De Beers 14% and Rand Mines 2%. Money was 1% per cent and discount rates—short and three months' bills—2%@ 27-16 per cent.

JOHNS-MANVILLE'S BIG GAIN Johns-Manville Company for the year ended Dec. 31, 1922, reports profits of \$2,012,528 after federal tax, compared with \$679,473 in 1921.

"A Select Security" United Soda Fountain Company

Cumulative Participating First Preferred Stock

First Preferred participates equally with Com-mon in dividends (cash or stock) on Common in excess of \$7.00.

'Select' because:

- a. The business of serving luncheons and non-intoxicating beverages from soda bars is expanding enormously because a rea! public service is per-formed economically.
- The greatly increased market for fountains, fixtures, etc., in the territory the organization covers has to the extent of 80% been captured by this Company, whose officers are men of youth, experience, ambition and vision.
- The Company's customers make a "blue ook" of the trade. Many have more than one installation, one having 37. The Company's earnings for 1923 are expected to show over 4 times the dividends on this stock.

LIVING COST TREND IN WEST UPWARD

Increases in Price of Food in Big Cities Shown to Be Chief Factor

SAN FRANCISCO, Cal., March 5 (Special Correspondence)-The cost of living in San Francisco, Oakland, Los Angeles, Seattle, Portland and the entire United States turned definitely upward during 1922, according to a report just issued by John Perrin, chairman of the board and federal agent of the Federal Reserve Bank of

In the last quarter of the year the cost of living increased in all reporting cities in the west, says Mr. Perrin. From September to December, 1922, the following increases in food, clothing and housing are given by the federal reserve bank head: Food, San Francisco and Oakland 3.1 per cent, Los Angeles 4.0 per cent, Seattle 1.7 per cent, Portland 3.2 per cent, entire United States .1 per cent; housing, San Francisco and Oakland .2 per cent, Los Angeles .2 per cent, Seattle .1 per cent, Portland .06 per cent, entire United States 4 per cent

tire United States .4 per cent.
Mr. Perrin says: "Little uniformity in the movement of separate items of the family budget in the five cities can persisted, have been small while advances, particularly in foods, furniture and house furnishings, have been relatively large. The reported increase in the total cost of living following the rise in wholesale prices, which was observable during the whole of 1922, is not surprising nor unexpected. According to the United States Bureau of Labor's index numbers they were 13 per cent higher in January, 1923, than in January, 1922."

CENTENNIAL COPPER HAS LOSS IN 1922

The annual report of the Centennial Copper Mining Company for the year ended Dec. 31, 1922, shows a loss for the year of \$52,605, comparing with a loss in 1921 of \$50,945, and in 1920 of \$131,052.

No copper was produced during the year. Net current assets at the close of the year were \$146,023, of which was represented by cash and eased somewhat and then scored slight Government securities

CHICAGO LIVE-STOCK MARKET CONTINUES ITS IRREGULARITY

CHICAGO, March 14—The irregu-larity which was evident in Monday's trading, continued in yesterday's live-stock market. Cattle were slow with the closing weak on practically all grades. Lambs were also soft. Hogs were in good demand at prices 10 cents to 15 cents higher. Receipts, prices and conditions were as follows: Cattle—Receipts, 11,000; beef steers, un-

were as follows:

Cattle—Receipts, 11,000; beef steers, uneven slow; generally steady to weak; closing weak to lower on practically all except good to choice handy weight kind; top \$10, weight 1136 pounds; bulk, \$3.400 9.55; fed Nebraska, \$8.75@9.50; pulp fed Colorados, \$8.909.35; few, \$8.40; yearlings scarce; few head, \$9.50; she stock and bulls, strong to 15c higher; spots more on beef helfers; numerous lots beef helfers averaging 600 to 800 pounds, \$1.5007.50; veal calves quality considered 25 to 50c higher; stockers and feeders, firm; bulk \$4.5008; selected half fat breeders averaging 1069 to 1248 pounds for Mineral Point district, \$9.25; bulk veal calves to packers, \$2604.25; bulk veal calves to packers, \$2604.25; bulk veal calves to packers, \$2605.5 shippers upward to \$12.50; bulk bologna bulls, \$4.85 to \$5.

Hogs—Receipts, \$6.000; 10 to 15c higher than yesterday's average; closed strong; bulk 150 to 215 pound average; \$8.450

Hogs—Receipts, 38,000; 10 to 15c higher than yesterday's average; closed strong; bulk 150 to 215 pound average; \$8,45@ 8,50; late top. \$8,65; bulk 225 to 300 pound butchers, \$8,15@8.35; packing sows, around \$7.25@7.40; pigs, mostly \$7@8; estimated holdover, 7000.

Sheep-Receipts, 14,000; fat lambs uneven, weak to 25c lower; top \$14.65, paid by packers for 78 pound Colorados; no strictly choice handyweight kind offered; bulk wooled lambs, \$14@14.50; two loads clipped lambs, \$11.75, with heavies at \$3.75; heavy wooled lambs mostly \$12.75 @13.60; yearlings and sheep, steady; choice 88 pound fed yearlings, \$13.40; two loads desirable 106-pound ewes, \$8.60; other kind mostly \$7.50@8.25; aged wethers \$3.50 with some two-year-olds up to \$10.75, feeding and shearing lambs, steady; two cars 70 pound averaged \$14.85 on country account.

GRAIN MARKET ADVANCES TO HIGHER LEVEL

CHICAGO, March 14-Wheat averaged a little higher in price today during the early dealings, an advance in Liverpool quotations tending to bring about some buying.

The opening, which varied from unchanged figures to % higher, with May \$1.19%@1.19% and July \$1.14%@ 1.14%, was followed by a slight sag and then by a general upturn above yesterday's finish. Corn and oats swayed with wheat After opening unchanged to %c. higher, May 73% @73%, the corn market

Special from Monitor Bureau

CHICAGO, March 13-If University of Michigan were stronger in the heavy favorite to win the team championship of the Intercollegiate Conference Athletic Association at the thirteenth annual indoor track and field games at Evanston, Friday and Saturday. With University of Illinois, title defenders, showing power in the middle distances and dashes, and University of Iowa bidding strongly in the the issue appears very much

Several "Big Ten" members have individual stars who will cut in for first places to an extent that should throw the decision into the hands of those who can count heavily for seconds, thirds, and fourths. Such a situation usually favors Illinois, which has won the team honors for three years. Sel-dom has the sprnkling of individual dom has the sprnkling of individual brilliants been so even among conference rivals.

Only two champions are to defend their events. C. R. Brookins' 24. Iowa runner, has a good chance to retain his title in the 50-yard dash. Last year he tied the Conference record in In a duel meet at 75 yards he was defeated by R. E. Ayers of Illinois, who will probably be his most formidable challenger. The list of other good men includes R. T. Worlein '24, Northwestern; W. D. Hubbard '25, and B. S. Burke '24 of Michigan; F. G. Tykle '23 of Purdue, and F. G. Connell 24 of Ohio State.

The other title defender, Capt. R. F. Spetz '23 of Wisconsin, has not done much this season in the 440-yard dash. His time of 523-5s., which won the race last year, has been bettered by Capt. E. C. Wilson '23 of Iowa, whose 51 seconds is within a fifth of a second of the Conference record, by Capt. P. C. Sweet '23 of Illinois and H. E. Hagen '23 of Northwestern. Another star quarter-miler, J. M. Pyott '24 of Chicago, who did little during the

It should be a close battle in the 880-yard run between Capt. E. E. Krogh '23 of Chicago and Capt. S. S. Crippen '23 of Northwestern, Both have run the distance in two minutes or better. Northwestern has another good man in this event in E. W. Tel-ford '23. M. E. Hall '24 of Illinois is fast half-miler, as is also L. M. Vallely '25 of Wisconsin. C. A. Reinke 25 of Michigan is another good runner in this event.

Captains Crippen and Krogh also are favorites in the mile run. J. M. Nay '24 of Indiana and G.B. Noll '23 of Iowa must be counted on also. Noll has made the best time, 4m. 30 4-5s..

With E. R. Isabel '25, Conference cross-country champion in the two-mile, Michigan should gather a point or two. S. C. Marzulo '25 will be a formidable opponent in this race, and may even be favored to win it. Crip-per of Northwestern also runs a fast

On the form revealed in previous meets, Iowa should capture the onemile relay. A quartet composed of C. F. Coulter '25, Noll, Brookins and Wilson has recorded the time of 3m. 26s., which betters the Conference record by 3 seconds.

Michigan probably will have a win-ner in the 60-yard hurdles in Hub-Fast time has been marked up by both H. A. Crawford '23 and Brookins of Iowa, and they should count heavily in this event. This probably will be one of the closest races on the program, because Illinois has a fast man in F. P. Johnson '24, and Chicago in C. J. Brickman '23.

In the running high jump P. M. Platten '24 has cleared six feet and should be able to take high honors this week by sustaining his performance. Michigan has two good men in R. W. Smith 23 and D. E. MacEllven '25, but there are a string of others of about the same callber, namely, S. W. Campbell '25 of Minnesota, E. B. Donohue '24 of

Wisconsin and M. D. Pence of Purdue.
Michigan looks strong in the pole perhaps the two best entries, J. K. Brooker '25 and J. T. Landowski '24. Brooker has recorded a vault of 12ft. 8½ in., within two inches of the Conference record. H. J. Collins '23 of Illinois is vaulting right up with Brooker, and Wisconsin has two good men in William Hammann and G. H. Thomlinson '24. D. C. Teal

'23 of Purdue is another high vaulter. First place in the 16-pound shotput appears assured to Michigan if W. Van Orden '24 ean equal or better his best mark of 43ft. 11/4 in. F. J. Schild-hauer '25 of Illinois will give him good competition, as will Louis Gross '25 of Minnesota and M. E. VanEllis

F. J. Lowrey, a Canadian new to

United States hockey, playing a wing position with the New Haven Hockey

Club, has made a distinct impressio

on eastern followers of the sport.

Teaming with excellent stickhandlers

who play the passing game, and being

an accurate marksman, he has earned

first honors as high individual scorer

in the eastern division. Following close after Lowrey is G. P. Geran, one

of the cleverest stickhandlers of the

east with a total of 14. Geran is cen-

ter for the eastern champions and

came within one point of Lowrey's

score in the next to his last game,

when he played but half a game and

scored three goals. The Boston

Hockey Club groups the next three

scorers with J. G. Hutchinson at 12, J. M. Martin at 9, and A. H. Bright

at 8, all former Harvard University

men. Unofficial individual

Although the eastern division of the United States Amateur Hockey Association was faced by serious difficul-ties that seemed destined to hamper its progress at the start of the seamiddle-distance runs, it would be a son, matters untangled themselves satisfactorily and the league soon progressed sufficiently, judged by popularity, to be considered one of the best since the first formation of the league under the U.S. A. H. A., three seasons ago. Seven clubs were listed to start the division, but at the last moment Philadelphia was obliged to withdraw, being unable to assemble a team that would be strong enough to offer ample competition. This left six clubs: three from Boston, two from New York and one from New Haven.

Boston has been the city to provide winner in each of the two previous seasons as well as this year. The Boston Athletic Association led the east in the 1920-21 season, while the Westminster Hockey Club led the east and won the national title in the 1921-22 season and the Boston A. A. is again winner this season. Each of the teams started this season with uncertain prospects, but the Unicorn aggregation soon balanced itself and advanced through the entire schedule of 10 games without a defeat until its tenth contest, when it went down to defeat before the Boston Hockey Club.

The national champions, the Westminsters, formerly in Boston now in New Haven, were believed to be the logical winners again this season, but owing to internal difficulties arising among the players and management the team started slowly, changed management and closed the season with only six players having no substitutes. The team, however, was considered a contender until its second defeat by the B. A. A. when the latter clinched the championship and the New Haven sextet was forced to be

content with second place. No other club at any time seriously appeared as a contender for the title, but among the remaining teams the Boston Hockey Club showed up the This team has an aggregation of team has an aggregation of that is among the best in number having played with. for several years included-10-21 season, but for some men could not develop the necessary to gain the top. its captain and one other atly handicapped the team e season. YALE VICTORY IS LOOKED FOR

Wrestling Team Meets Harvard Saturday in the Blue's Last Dual Meet of 1923

NEW HAVEN, Conn., March 14 (Special) — Yale's varsity wrestling team will contest its last dual meet of the 1923 season with that of Harvard University here, Saturday. Prospects for a victory over the Crimson are considered very bright. Yale's schedule this season has by no means been an easy one, yet it has won the majority of the meets. The Elis opened the season with a victory over the strong Massachusetts Institute of Technology matmen; lost to Brown University, 14 to 11, on Feb. 16; de feated the University of Pennsylvania squad, 25 to 0, on Feb. 22; won from

WISCONSIN TEAM **FAVORED TO WIN**

Badger Gymnasts Enter Western Association Meet Set for Next Saturday

MADISON, Wis., March 8 (Special Correspondence)-The University of Wisconsin gymnastic team, with victories in dual meets over its strongest rivals, is considered the favorite in the race for championship honors this year in the Western Intercollegiate Wrestling, Fencing, and Gymnastic Association. The meet will be held Saturday, March 17, at Columbus, O.

The other strong contenders for titular honors in Division A, the University of Chicago and the University of Minnesota, both have been defeated by Wisconsin by close margins. The Badger victory over Chicago was the first scored by any team in the past five years. Illinois, the other team in Division A, is not considered especially strong this season.

F. B. Leitz '23, stellar performer of a year ago, has withdrawn from the team in order to act as coach while Coach F. E. Schlatter is on leave of absence. His task has been made easier by the fact that he has a team made up almost entirely of veterans. Wisconsin relies mainly on four men

in the competition for the western championship. H. D. Kitchen '23, captain of the squad, has bested every opponent in tumbling, his single event. Walter Porth '23, a point winner in 1922 in three events, is the mainstay of the Wisconsin squad. Last year he won first in the parallel bars, second in club swinging, and was tied for year he was the outstanding star of the championship matches. He has a second in the flying rings. The team peculiar form in wrestling, as he uses has been strengthened by the addition his legs to a much greater extent than of Frank Kubosch '23, who was inany other wrestler on the squad and eligible last year. Kubosch this year Promote Athletics and on the squad and is extremely agile.

Another near champion is Capt. J. J. MacKay '23, of the heavyweight division. For two years he has been another sure point winner, took second last year on the side horse. Other members of the team are H. W. Schmidt '25, Theodore Stevens '24,

> E. Pfleger '23. Although there is no fencing coach at Wisconsin this season, A. W. Thompson '25 and J. G. Reinhold '24, won two out of three matches in the Chicago dual meet, and are expected to make good showings in the intercol-

COLUMBIA MAY BE A CUP CONTENDER

New Fishing Schooner Will Be Ready for Launching Soon GLOUCESTER, Mass., March 14-

The Columbia, latest addition to the Gloucester fishing fleet, which will be ready for launching within a few days, will join the minority group of the fleet sailing from this port and will engage in the salt-fishing industry. The new schooner, hailed as contender for honors in the annual international fishermen's race, has been built for fishing rather than for racing, and no fishing trip will be abandoned in order that she may take part in the elimination races to choose the representative of the American fishing fleet, her owners, the Columbia Associates, announced last night.

contestants have been salt-fishers.

Whether the Columbia will ever gain racing honors or not, however, president of the league, and a owners of the schooner have signed Capt. Alden Geele of Yarmouth, N. S., part owner of the schooner Elsie, nose two years ago, as skipper. He s expected here soon to take charge of the vessel

If the Columbia ever meets the present champion of the fleets, the Bluenose, two schooners would be meeting on an even footing for the first time in the history of the international competition, Gloucestermen say. Controversies of the past in connection with the races have had as their bases largely the fact that the majority of the American fishermen were built for gathering their catch and speeding to market with the fish still fresh, while Canadian fishermen catch and salt their fish in leisurely manner and carry larger cargoes back to port.

While declaring that no fishing trip will be abandoned in order that the Columbia may take part in the elim-Columbia Associates said last night that should it so happen that the schooner was in port when the races were held, she undoubtedly would take part in the trials.

OTTAWA TAKES FIRST CONTEST

Schaefer Unable to Play Steadily Causes Surprise by Defeating Toronto Granites - Second Game Tomorrow Night

TORONTO, March 14 (Special)-The foronto Granites will enter the sec game tomorrow night with the Ottawa St. Patricks better prepared to meet the unexpected opposition experienced in the first contest of their Allan Cup elimination series, and de-termined to overcome the one-goal lead which the latter holds by its vic-tory here, last night by the score of 2 to 1, causing the biggest surprise of the amateur hockey season in e

Canada.

The winning team was not expected to extend the locals, and when the second period ended without either team scoring, the opinion was that the Alian Cup holders would start a scoring bee in the final 20 minutes.

Even when Ottawa scored the opening goal of the game, there was no doubt among the local supporters as to the ultimate result, and the scoring of the second goal of the game by Granites was looked upon as the first of many. Visions of a tie game became numerous as the end of the game approached, but when Ottawa scored the winning goal with only a minute to go, inning goal with only a m

the large crowd seemed amased.

The main reasons for the Granite's defeat was their over-confidence, the persistent checking of St. Patricks, and some remarkable work in the visitor's goal by Byrne. The visitors played hockey of a very clever brand and their defense system was more than the Granites could solve, except on a few occasions, and then Byrne stood in the way.

The visitors adopted a defensive game from the start and forced the locals to carry the attack to them, and they generally broke away with one-man rushes, except when there was only the Granite defense to defeat. When not in possession, they stayed back in their own end of the rink, and the formation they made was a hard one to penetrate. They back-checked strongly. On the attack, Touhey at ring wing and O'Connor were the most prominent, while Burnett showed some great checking in center ice.

Fox, Munro, and Watson were the best for the locals, who made a disappointing showing. They missed several good openings in front of the Ottawa goal and their individual attacks proved easy for Ottawa to break up. Although they had more shots on goal than did their opponents, only one was successful, for Byrne was a veritable stone wall. Burnett scored the first goal on a pass from Touhey and the coal on a made by O'Connor on a rebound after a three-man attack. Watson notched the locals' only counter on a pass from Smith. The summary:

OTTAWA Score—Ottawa St. Patricks 2, Toronto franites 1. Goals—Burnett, O'Connor for Ottawa; Watson for Toronto. Referee— Donald Smith. Time—Three 20m. periods.

STATE EDUCATION CHANGES PROPOSED IN CONNECTICUT

HARTFORD, Conn., March 14 (Special)—Educators and citizens interested in educational matters in Connecticut are exercised over a bill nov the Connecticut Legislature which they assert would, if enacted into law, legislate Albert B. Meredith, commissioner of education, out of

Dr. Meredith came to Connecticut from New Jersey three years ago to head the State education department and his administration has been commended by educators and the public generally. The bill, among other things, would require the commis-sioner of education to be a resident of the State for six years immediately preceding his appointment, and as Dr. Meredith has lived in Connecticut only three years, the effect of the proposed

w would be to remove him.

The bill also would take from the State Board of Education the power

Harvard Prepares for Two Hard Games

Basketball Coach Experimenting With Crimson Varsity Five

Two more games remain on the Harvard basketball schedule for this eason, the first one next Friday night with St. Francis College of Brooklyn, and the final, and most important one of the season, next Tuesday night with to the schedule yesterday, and will bring one of the strongest teams in the east to Cambridge. St. Francis this year defeated Springfield Training School, considered one of the best quintets in the east. Coach E. Wachter Jr., of Harvard, declared yesterday Mrs. W. M. Shedden of Boston, wife that he thought his team had only an even chance with St. Francis, and that while an excellent game was in prosend and punter, and it required 24 pect, the major attention this week will be given over to preparation for the Yale contest.

Harvard will launch an especially desperate attempt to defeat Yale. Besides being a natural rival, Yale has also won the championship of the Intercollegiate Basketball League, of which Harvard is not a member, and the Crimson would like nothing better, therefore, than to topple the Blue. Coach Wachter is willing to forget the rest of the season if he can beat Yale. asy time defeating Mrs. N. W. Niles, oston, in straight sets, 6-1, 6-2.

Mrs. F. H. Godfrey of Boston, who Wachter's, is coaching Yale, having performed remarkably well by bringing winning the title, had an easy time up last year's cellar team to the championship of the league, and with practically the same material that was available a year ago. Yale, of course, has a wonderful team, and with the from Mrs. P. W. Sprague, advantage of one victory over Harvard already this season, will go into the classic battle a decided favorite Basketball is growing very popular at Harvard. Last year the Yale game drew only a scattered few, while for this year's game seats will be difficult to obtain, and many of the other

contests this season have drawn very at Paris. French Rugby, judging from large crowds Coach Wachter invited considerable surprise yesterday when he announced that there would be a shift in the Harvard lineup Friday night, a radical one, probably, which, if it proves successful, will be held to for the Yale game. Harvard's trouble re-volves about the center position. With the loss of R. W. Fitts '23 through ineligibility this season, the center position was left open with no really strong candidate to fill it. W. V. Miller '23, a football letter man, and a basketball veteran of three years' of the home forwards in loose rushes experience, has been used most of the season but has failed to measure up under the strain of hard games. Miller, therefore, was removed from center in practice yesterday and Capt. Louis Gordon '24 was shifted from right forward to the pivot position.

N. H. McElroy '25 of the second team opposed Gordon and easily outjumped him, but he cannot get the call for position because he is nowhere near the proper floor caliber, due to fullback, compared very favorably lack of experience. A. E. McLeish '23, with their opponents. Although the last year's captain, who was shifted general standard of the play was beto guard at the beginning of this season to add offensive strength to the national match, there were moments terday for a trial, pairing with M. B. Lowenthal '23, the brilliant little reg-

wresting, and reneing Association of the transportation of the tra Wachter very obviously was not satwith his men. Given a fast, powerful, the Welsh forwards gradually gained center, his problem would be solved. Harvard students declare it is remarkable that the team has done as well as it has, with the lack of neces sary material.

TEACHERS' SCHOOL

SEEKS MORE FUNDS

NEW HAVEN, Conn., March 14 (Special)-The summer school for teachers which the Connecticut State Board of Education conducts here has ecome so popular that the facilities of the school have proven inadequate and the state board has been obliged to ask the Connecticut Legislature to increase its appropriation for the work

from \$10,000 to \$15,000. The enrollment last summer was 944 and the indicated enrollment for the coming Summer is about 1200. The classes last summer were considered too large then, and with the prospec tive increase in enrollment, it is feared the classes will become altogether too unwieldy. It is to eliminate this overcrowded condition that the increased

appropriation is asked. The state board has been given the use of a number of rooms in the Yale buildings without charge by the university, so the additional \$5000 will go toward engaging extra instructors. The school is affording the teachers opportunities, without charge, to learn the most modern educational methods. Teachers from all parts of the State

VALE PROFESSOR TO RETIRE NEW HAVEN, Conn., March 14-Announcement was made today that Prof. Lester P. Breckenridge, chairman of the department of mechanical engineering at Yale University, will retire from active teaching in June. Professor Breckenridge came to Yale from the University of Illinois 14 years ago and during this period there have been notedevelopments in the department. He was graduated from the Shef-field Scientific School in 1881. George Grant MacCurdy, assistant professor of prehistoric archæology, has been promoted to professorial rank, with the title of research associate.

OUTSIDE TEAMS PLAY TODAY MILWAUKEE, Wis., March 14 (Special)—Today the strong outside teams entered in the American Bowling Con-State Board of Education the power of appointing this official and put the duty of nominating him in the hands of the Governor. Senator John N. Brooks, author of the bill, disclaims any intention to effect the removal of Dr. Meredith, and explains that his bill is aimed at centralization.

The unpopularity of the bill is reflected in the large number of resolutions of protest that have been passed by educational, civic, community and parent-teachers organizations in the State, and its passage is unlikely.

ENGLAND MEETS SCOTLAND SOON

Match Comes Off Saturday France to Be Met Later

LONDON, March 2 (Special Corre-pondence)—In view of the fact that after her important encounter with Scotland at Inverleith, near Edinburgh, on March 17, England has to oppose France, the recent visit of the French Rugby football team to Swansea, for a match with Wales, created of the season, next Tuesday night with great interest. As mentioned in these Yale. Friday night's game was added columns some while ago, the 1922-23 international rugger tournament has so worked itself out that the destination of the championship honors depends, to all intents and purposes upon the eagerly-awaited Anglo-Scot-tish game. After that, England concludes her program by meeting France in Paris on April 2. Either Scotland or England, or possibly both, must head the final championship standing. Both are, at present, undefeated.

> a Rugby genius in A. L. Gracie, its shrewd and powerful driving and captain, it will take the field against checking by practically every player, England with bright prospects of vic- thrilled an audience of over 6300 Not that England's prospects enthusiasts.
> be any less bright on that All the scoring was done in the first ional play after this season, Davies in rapid succession by reason of his forthcoming marriage, Kershaw because he is likely to the entire visiting team seemed

the impression that, notwithstanding possible reinforcements in the French team, and the fact that the game will be far from "charmed" Twickenham where the Frenchmen drew so bril-liantly last year, England will probably add another to its list of victories the team that played against Wales, has not advanced appreciably since last season. If anything, it has fallen back a little. Possibly because they were very, very anxious to defeat Wales, and prove that the pupil had definitely attained to the master's proficiency, the Frenchmen were very excitable, continually tackling a man ong after he had parted with the ball. As cabled to The Christian Science Monitor at the time, Wales gained a victory by 16 points to 8, a victory due, in the main, to the excellence toward the end of the game. In the pack. France was outclassed. Her forwards have an original, and sometimes effective, method of heeling out the ball and scrummaging, and it

took the Welshmen some while to settle down to it .- When they did so, however, they changed the complexion of the game. Once again, Wales disappointed outside the scrummage. The French halves, threequarters and stances of this.

As the game wore on it became rougher and rougher. The Frenchcontrol. Joseph Rees dropped a splen- ing extracts, provides that all liquor lead. It must be noted, however, that this State. With regard to this meas place of its seasoned captain, Rénè tion in his county was caused by exstrengthened by then. This it will medicinal preparation, containing one defeat at the hands of the Englishmen.

NEW BEDFORD PORT

MAY BE IMPROVED NEW BEDFORD, Mass., March 14 (Special)—A favorable report on the project of deepening and widening the channel of the New Bedford port and the anchorage and turning basins has been submitted to the River and Harbors Board of the United States Army Engineers in Washington by Mai. V. L. Peterson, an army engineer, of Providence. This fact became known when Major Peterson failed to notify the interested parties of his findings.

Under the regulations of the United States Army engineering service, interested parties are notified of the pur- a trained scoutmaster. port of the report by a district office only when it is unfavorable. When the report is favorable, however, the in- able to boys during the summer vaca formation must come directly from tion, and also, from the alumni point Washington at such time as the gen-eral board takes action., "The district interest in agriculture, to their state office is not permitted to give out the college. Mornings will be devoted recommendations in a favorable re-to agricultural instruction, through port," the major said.

VICE-PRESIDENT ON WAY HOME SPRINGFIELD, Mass., March 14— Vice-President and Mrs. Calvin Cool-idge arrived here today, en route to their home in Northampton, after the Washington season. Mrs. Coolidge plans also to visit her father in Burlington, Vt. The Vice-President declined to discuss politics. He said that it was apparent that the Administration had been successful in efforts to revive

SHOE MEN SEEK SUPPORT

STATE UNIVERSITY DEMANDS SHOWN

Connecticut Educator Says Situation Is Serious

HARTFORD, Conn., March 14-A. B. Meredith, secretary of the state B. Meredith, secretary of the state books is all that parents pay toward the education of their children.

Connecticut students went outside of From long observation of schoolbook making. I have come to see that a great Connecticut last year for college train-A ing. With Yale now at the point where few minutes later a Boston player, it says how many freshmen may enter that university and Wesleyan and Trinity approaching the same stage, "we face a situation which is serious." he declares.

This statement was made following discussion yesterday before the legislative Committee on Appropriations of what was considered by some to be a tendency at the Connecticut Agricultural College to branch out too sharply from the teaching of agricultural subjects.

Mr. Meredith said he was not prepared to say whether or not he advocated an expansion of the training course at Storrs along lines other than agricultural. He pointed out, however that under the statutes, the Connecticut Agricultural College has authority now to go far as it likes as long as it did not exclude training in agriculture and the mechanical arts. He pointed out that some students go to Storrs for two years and then finish their college education at one of the larger colleges or institutions.

The discussion arose during a hearing on a bill carrying appropriations of over \$800,000 for new construction at the college. Several members of IN MAINE PROPOSED the committee indicated by their questions throughout the hearing that they were interested in determining if the scope of the college should be limited or expanded.

State Publication of School Textbooks

there appeared recently in the anomitor a very favorable report on the state publication of school textbooks; a policy whose object is frankly shown to be not better books but merely cheaper books. The authority of the famous publishing houses, which from the days of Caxton has been the guarantee of quality is thus accounted as antee of quality, is thus accounted as of no weight, and the publisher, with his trained and experienced editorial staff, is set aside as a mere receiver of unearned increment.

Inside facts of state publications do not seem to sustain these opinions. In a certain State, so many books proved to be flat failures, as well as a waste of state funds, that the officials were driven to subterfuge. The law forbade the importation of books, so they rented the use of the plates of certain standard textbooks, and printed them

the state name.
Politicians' methods are well under-It is easy to cover up costs and make it appear that people are saving large sums in books, when part of the cost comes out of state moneys. It is also easy to exaggerate the estimates of what the publishers' books actually cost. The difference is slight, at most, when it is remembered that the cost of

publishing house is like a university a center of light and leading, a clearing house for the best ideas. A good pub-lisher has built up his reputation by years of attested service. His house has affiliations with the highest schol-arship throughout the country. His staff counts men of repute in many subjects. nen who are successful educators Great editors and publishers are born, ot made by the accolade of any state.

When these state tyros become equals, they, too, must have built up a house whose stamp means authority; and they will find that this scholarly authority and executive ability cannot debt to the wisdom and learning of editor and publisher.

from 47 states! This consideration alone shows the fallacy of state publication. To exclude from one state the products of another is surely opposed to real Americanism, as registered in the Constitution. Especially is this true of the spiritual and intellectual fruitage garnered in a good book.

The actual flaw in the system of state publication is indicated by the word communism. While human nature remains what it now appears to be, communism in any business means laxness. Business needs the incentive

laxness. Business needs the incentive of individual success, the spur of com-petition. Probably nowhere is this urge to excellence sharper than among rival speak in the afternoon at 1:45 o'clock

To the Editor of The Christian Science publishing houses, whose books must Monitor:

There appeared recently in the Monup to standard and up to date.

A state might better make children's gloves and shoes than their textbooks. It does not particularly matter about the quality of gloves and shoes, but nothing is more important than the quality, character, tone of the books given to children. A book may cost a dollar or two, but it lasts. Shoes perish in using. In many homes schoolbooks in using. In many homes schoolbooks are the only books actually owned. To school and home on some distant Main Street a good schoolbook is worth

TEACHERS TO HEAR TALKS ON ENGLISH

Institute at Concord to Take Place of Visiting Day

CONCORD, Mass., March 14 (Special)-A teachers' institute, the first ever held in Concord, will take place in Eaton Hall, Concord High School building, on Friday. The institute has been arranged by Wells A. Hall, superintendent of schools, in the place of a visiting day for the Concord teachers. Teachers, superintendents, and members of the school committees of schools in surrounding com-

munities have been invited to attend. The morning session will open at 10 o'clock, and Charles Swain Thomas, former teacher of English in the Newton High School, and now on the editorial staff of the Atlantic Monthly, will address all the teachers on the importance of good English, and later be fairly paid by an "overhead" of speak to the high school English per cent. People who write for good teachers on "Practical Methods in High School English." Harry E. Gardner of the State Department of Edueditor and publisher.

Genius is rare, and we cannot yet hope to produce 48 books of epochmaking power in all school subjects. Under the system of state publication. the greatest books would be excluded from 47 states! This consideration of the Bartlett School of Lowell, who shows the fellows of state publication of the Bartlett School of Lowell, who have shows the fellows of state publication.

Reactions of a Reader

of family relationships, family removals from one town to another in search of richer prospects. It has insight and power. The lawyer, Skeet's father, is real, so is the boy's grandmother; they alone. The first shudder comes with the approach of she was somewhat timorous. Particularly she was somewhat timorous. Winifred, Skeet's first love and an unspeakable prig. Then Skeet treads a dull and devious way through school, a print shop, several lawyers' she could aspire. The chief had said offices before he sets up his own. He he wished someone, with or without is steadily in revolt against tasks experience, but someone who knew thrust upon him, for we are asked to "Robinson Crusoe" from "Swiss believe that he longs to write. Why Family Robinson." A standard worthy doesn't he? When the book closes of emulation by other rare book and we feel we have seen him through sellers. a world of experience, still we are told that he has not started to find himself." Beginning with that infant prodigy, Winifred, the long procession of women characters ends with Becky, the exasperating. We cannot feel that a woman has invariably to dance up hill and down dale, playing had from the descriptions of various dance up hill and down date, playing hide-and-seek around tree trunks, in order adequately to express her bucolic abandon. Becky, in short, is absurd. But it's no matter; for Skeet absurd. But it's no matter absurd. But it's to publish them under an assumed name. Why should Mr. Masters have set forth these adventures of Skeeters Kirby? They are utterly unworthy of Mitch Miller. Perhaps it was done to vent his dislike and distrust of the gentlemen of the law. That, to be sure, he does in whole-That, to sale fashion.

Of course, it is distinctly careless to be discovered reading The Saturday Review for Jan. 20. But it is worth the confession. For in it Gerald Gould is reviewing "Middlemarch," in Blackwood's Standard Edition, reviewing it as though it were a new book. And the best part of all is that he had actually not read it before. How beguiling! The mere spectacle of anyone confronted today, in the midst anyone controlled today, in the midst of so much that is unutterably trivial, with such a stupendous achievement, is somehow most engaging. Mr. Gould rightly sees his recent task as a "safeguard" against the too easy heralding of geniuses,—a touchstone by which to weigh them. Would that more reviewers could hark back to masterpleces of English fieting. The result could of English fiction. The result could be only stabilizing and quieting, fruit-

and bronze, and the artist has subtly stance, this author refers coolly to Sir Harry Otway, "who need not be described." I, for one, warm to that On the terrace above the broad and stately steps stands what one would most adequate description, developed feel tempted to call a rock, from which by certain adroit allusions as the story proceeds. But, half-way along, the book becomes merely silly. And Mr. what daring but admittedly success-ful experiment—depicting him as he was wont to address the people. Un- and Her German Garden," in her derneath his muse is seen reaching latest book, had an opportunity to be hugely entertaining.

hand inscribing the word Patria in the The World's Classics, issued by sounded much more attractive if the plants had had it in his memory and had not been obliged to depend upon the score for his rendering.

Two new works were introduced of the shorter sonatas, the early F major, At the base of the rock is a harmoniously conceived group symbolizing the Brazil of today and the Brazil of the shorter sonatas, the early F major, At the base of the rock is a harmoniously conceived group symbolizing the Brazil of today and the Brazil of today and the Brazil of the future. There is the figure of a "Years of Childhood," and "A Russian" the future. There is the figure of a volunteer, holding the Brazilian flag

HUDSON W. 44 St. Eves. at 8:30 Mts. Wed. and Sat. 2:30 Mts. COHAN'S International Comedy Sensation "SO THIS IS LONDON!"

THE matter presented itself in this guise. If a person must read a story of the middle west, he might safely select Edgar Lee Masters with expectations that he would prove the least repellant. "Skeeters Kirby" (New York: The Macmillan Company), dealing with the adventures of Mitch Miller's pal, held promise. At the outset it is agreeable enough reading. A sincere and simple tale of family relationships, family re-

To the bookish, few things are more alluring than book catalogues. The rank and file of us are obliged to restrain our impulses. Therefore, the joy of the purchaser is not for us. But there is much satisfaction to be proprietor of this bookshop, or of one of New York's more exclusive shops, who boasted not long ago that he did not admit a dull book to his shelves. It matters enormously that someone has taken such a laudable stand.
M. W.

London Stage Notes

London, Feb. 23

Special Correspondence

With a good sense that is not often encountered, Miss Marie Tempest has, instead of scolding them, accepted the unanimously adverse verdict of the critics upon her recent production of "Good Gracious, Annabelle!" at the Duke of York's Theater. She has accordingly decided to withdraw the piece and replace it by something better calculated to make an

of English fiction. The result could be only stabilizing and quieting, fruitful in a saner outlook and estimate.

Although the plot and conversation, in E. M. Forster's "A Room With a View." soon begin to meander in maudlin fashion, the book is refreshing in its daring. Daring in a novelist appeals to most of us. For instance, this author refers coolly to Sir Horry Otrace, "who need not be George's Pension Fund for actors and George's Pension Fund for actors and George's Pension Fund for actors and

ZAHN'S

REVIEWS AND LITERARY

his cool cheek. But I admire Mr. Bennett's cool cheek, and am prepared to pay twice as much as he charges for novel then? Would it compare with these scattered comments of Arnold you please, we hope there is another alternative to "low-brow"); and he now furnishes us with a second series of "Things That Have Interested Me."

He knows we shall want it. Mr. Bennett was really vulgar. But their very active resentment must have been prompted by something, son would never move a critic's re-sentment. It would not move him at all. He would just look at it for a minute, drop it, and forget it until he noticed that far too many people were mistaking it for literature; and then, naturally, he would be roused to inform them that they were over-doing their enthusiasm. He would not, observe, waste time in advising Mr. Hutchinson where and why he had failed in the art of writing. But, we may be almost sure there is something of importance in what he has said: the resentment felt may be only the annoyance of composure for being discomposed. Our annoyance ought to warn us that we had better look at the matter carefully, and not in vulgar, often my own feeling as a on their secret conscience when at with amazing industry. Despite conwriter is that I should like to be so last they met him; what they really vulgar that a multitude would attend felt when they heard a Bach fugue, or to what I had to say on those matters when they saw some pointing of which appear to me to be of consequence. For have we not been enjoined to speak in the vulgar tongue?

Mr. Bennett has one virtue which some fine writers would give a little

of their dainty reputations to possess; he is interesting. He appears to sup-pose it to be his business as a writer pose it to be his business as a to gain our attention on the first page, to gain our attention on the last. More to keep it till the last. often than not he succeeds in this. I believe he would admit we should deserve our money back if he were careless over this primary duty of a writer. Let us see, now, how he be-gins his entertainment.

That name will convey little or nothing to most people. By itself it would be, I deeply regret to confess, unattractive and even unintelligible. Mr. Bennett knows that. He knows that not one in a thousand of us has ever heard of Dr. Rivers. But he does not mock our pathetic ignorance. He does not begin by a show of superior knowledge. He says at once: "It was Siegfried Sassoon who introduced me to this really great swell. He 'You must know him. You'll Other young men spoke of

rulgar And the phrase, "of the first order," is slovenly if one pauses to reflect about it. The truth is, one does not. A reader is so anxious to hear sbout this "great swell," whose name he does not even know that he forgets to protest against cliches, Mr. Bennett gives an impression that he has some thing of importance to communicate. and he does this in a casual and lazy way, as though there could be no matters in his life but those of importance, and they slightly bored him, Of course, too, though W. H. R. Rivers was a very remarkable man, and an author and scholar whose research work and original ideas were generative, yet the and are far better known than his. Those who knew him, or who were Tale" and Kathleen Norris's "Some aware of his work, do not complain of People of Importance" in that it is not in a few pages of this "Second Series" of things that have interested him, Mr. Bennett coolly nudges us into attention to a significant contemporary phenomenon, and so we become definitely

Merely a Notebook

Why is such a book as this dis-paraged because it is merely a note-

another installment of it. He is well aware of the ubiquity of such non-literary men as myself, people for which happens to have engaged his horrifying condemnation (there is no books and men, music, foreign travel, the drama, and anything which happens to have engaged his interest? Tested so, such a novel is whom the insuit of high-prow is a seen at once to be a piece of gross you please, we hope there is another assumption, its knowledge thin and inaccurate, its observation ill-directed, its associations false, and its drama but a trumpery device to make objects and ideas appear coherent which Of the first series the critics said are really unrelated and incoherent. That is why experienced readers find it hard to read so much of our modmr. Bennett was really vulgar. But accepted which falls below the stand-ard, say, of "Babbitt." Mr. Sinclair and evidently that was Mr. Bennett's book. Now, a novel by Mr. Hutchin- of a long and ardent study of the people about him, and their ways; it is a full and valuable notebook transmuted by the imagination into the design of a shattering argument. Such a novel is in quite another category. We should be foolish not to prefer Mr. Lewis' notebook in that transmutation. Yet, so good is his selection of the material, and so striking is the comment implied in the

> The Books of the Future I think notebooks, too, books in souls have jotted down their views of contemporary men and manners-the look of a big draper's shop on bargain when they saw some painting of

Whistler's, or when they heard the

Prime Minister speak, and so on-are

mere selection, that we should have welcomed Mr. Lewis' work had it

been no more than his bare notebook.

to be the books of the future which And do not let us imagine every man might dare to write and publish a notebook. A poverty-stricken but sanguine intelligence would be exposed at once for what it was, if it made the attempt. The standard set for that kind of literature is high and difficult enough, for we must remember Havelock Ellis' "Impressions and Comments," and Butler's "Note Books," precedents likely to make a modest man blench. And nobody should dare

Chicago.

The first few pages produce a feeling of confusion, but it is like that experi-

enced on visiting a friend in a strange

late in the story.

Collected and edited by Horatio where it is possible P. Brown. London: Murray in their right per-York: Charles spective, the imparsishmer's Sens.

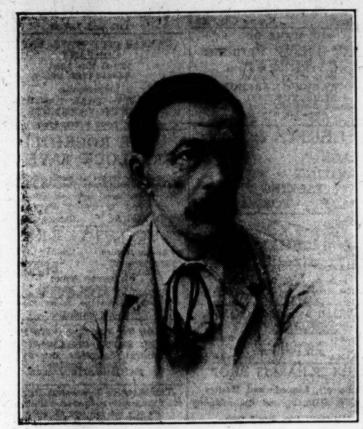

Jowett, who associated with giants and had the appraising eye, declared in 1887 that Symonds had attained 'eminence" and was able to win a permanent place among the first writers of his generation—which was tantamount to dubbing him "great" in the era of Tennyson; Browning. Robert Louis Stevenson, and Mere dith; while Walt Whitman held him to be in "some ways the most indicative and penetrating and significant man of our time." But perhaps Walt Whitman was not wholly unbiased in his judgment of this first among Englishmen who had capitulated without a struggle, to his rugged genius, and whose attitude toward him remained throughout instinct with an admiration as eager as it was reverent.

The literary critic of Addington Symonds today is so certain, within measurable distance of his opening remarks on this subject, to state that the author of "Renaissance in Italy was not a great writer that it may be taken for granted he did not fall far short of the title. In some things, indeed, he did approach near to greatness. He combined with profound erudition an intense love of the which good observers and candid beautiful, which he sought untiringly to bring to the attention of others. It is hardly fair to say that he is at his best in his letters, for they at the matter carefully, and not in day; the vagaries of food prices; what brief epitome of herculean tasks which resticular critics that Mr. Bennett is surprising effect a famous man worked he set himself, and carried through represent but the edge or occasi necessitated living abroad and visit-ing England but seldom, Symonds' essays, his sketches, studies and volumes of verses are fraught with the intellectual energy and courageous determination of one who, despite

Table and Other Sketches

John Marr and Other Poems

The Princeton University Press, apparently, has been engaged in the latter form of exploration. It has culled from Harper's and Putnam's magazines, during the years 1850 to 1856, 10 prose sketches and published them letters, is the aristocrat, the Brahmin a well-made, attractive little

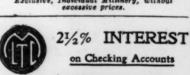

volume. The only one of the ten which held much interest for the writer, is the one critical essay, "Hawthorne and His Mosses," and this largely because of the friendship between Melville and Hawthorne. The other pieces are on a variety of homely subjects, faintly reminiscent of Hawthorne as essayist. Frankly these sketches have no marked originality of subject or treatmarked originality of subject or treatment. knowledge of who the author was, they would, in most cases, we believe, be cast aside as dull and of no literary value. Knowing them to be Melville's, something of his amazing personality and curious phraseology makes itself an ability to appreciate those of felt. But there is hardly a trace of the hour. "Moby Dick."

As for the poems, which form a companion volume, they are almost negligible. It is surprising that he could not put into the sea verses more of his wonderful feeling for the sea. Obviously he was not a poet and made no attempt to master the poet's art. True, the poems have a certain vigor and picturesqueness, but no beauty of form, or rhythm, or thought. Battle Pieces are, perhaps, the most interesting, being in a sense his commentary on Civil War days. But

these, too, are crude. The publication of these volumes, though undoubtedly valuable to the Melville collector and devotee, only serve to strengthen the growing conviction that the author of one of the greatest of all sea stories was a man of one book.

M. Du Bos Enjoys His Authors

Approxima-

will recommend it to many, for M. Proust's life and work are the topic of discussion in the literary circles of Paris and London, and M. Du Bos' critique is worthy of its subject. "A la Recherche du Temps Perdu" is recognized as something really new in the field of letters; and, though

To read this book, l'Esprit" is the heading given to this of literary criticisms section of the appreciation. It is the is an exhilarating experience. Its author, dation to Marcel Proust's amazing

Among the other articles contained recognized as something really new in the field of letters; and, though much has already been written about the book, an analysis of its originality will be walcome. M. Du Bos enjoys his authors, enjoys them so much that he cannot resist quoting them. Thus, in the Marcel Proust article, the captivated reader is given the whole of the passage descriptive of the Clochers de Martinville, and he is bidden to see and understand the intellectual discipline which has given form to the vision. "Le Courage de life and not the works of the author is the sub-definition." The world has long ceased to be in doubt as to the value of Baudelaire's poems, but his life, in 1921, had not yet yielded the lessons it contains. In the year 1917 appeared in the Revue de Paris Baudelaire's letters to his donoter, but the documents did not receive at that time the attention they deserved. Yet they alone enable the intellectual discipline which has given form to the vision. "Le Courage de background which belongs to them."

American republics. Sophia, the heroine, is the step-daughter of a former president. Through some strainting of personality, situations, and imagination, she is called "Star of Earth," evidently for the sake of giving the book a fairly good title. It is difficult to decide whether the author is struggling for subtlety—which he deciments did not receive at that time the attention they deserved. Yet they alone enable the background which belongs to them. life and not the works of the author

Hope. New York and London: The Century Company. \$1.75. "My Lady's experiences of them all. Masie and Joe, Bargain" is the first novel of this Englishwoman who, since 1910, has been writing excellent short stories. In this delightful romance, she is bound to score a marked success. Upon the score a marked success. Upon the Williams, one of Cromwell's trusted officers, tells the story, which is his own, in a manner to carry the reader swiftly from one complication to another with no clue to what may be coming next. The book is full of surprises and one may be sure that whatever happens will be entirely different from what was expected. The reader does not even discover there is a most.

there is more in everyone than he can express in a lifetime." The Optimist. By E. M. Delafield. New York: The Macmillan Company. does not even discover there is a most \$2. The lack of sympathy and underinteresting mystery tucked away in the dramatic love story, until the author is willing to let him suspect it, which is standing between parents and children successive generations, was the theme of E. M. Delafield's earlier novel "Humbug." In "The Optimist" she relin Wyatt. New York and London: Harper & Brothers, \$2. "The Invisible verts to the same general problem "Humbug" was concerned with the different standards in education; this last book deals with deeper fundamentals of experience. The reader feels from the first that Canon Morchand, the irre-

pressible optimist, is something of a humbug, although he himself never suspects it. Behind his narrowness and suspects it. Behind his narrowness and his imposition, always by gentle means, of his own standards upon his family, there lie the sterling qualities of honesty and a deep love for his children.

The young people submit, up to a certain point, when each rebels in his own way. There is the thread of a love hut it is slight and unsatisfactory. generation, interwoven with the sec-ond, with an occasional backward glance at the grandfather. The story opens in 1882 and deals with the fol-lowing 40 years of the Marshfields in

The strength of the book, like that of its predecessor, lies in its analysis of motives and character. It is not entirely pleasant reading, but it furnishes much food for thought likely to clarify one's own ideas.

Isan economy, from the rudimentary stage onward to the practical application of present-day methods.

There is need for just such teaching and for the study which the little volume invites. Millions of American women, recently enfranchised are

a genuine thriller, he introduces a new of political affairs, to assert their deof literary criticisms is an exhilarating experience. Its author, By Charles Du Bos, Librairie Plen. Writes of deeply intellectual things in a simple way. He leads along the path of understanding to heights of intellectual sincerity. By far the most extensive criticism in the book deals with the work of Marcel Proust. This with the enlightenment provided by a symbol will recommend it to many, for M. Description of literary criticisms, but this prose work by the average reader, and structure.

Section of the appreciation. It is the quality which has provided the foundation to Marcel Proust's amazing structure, samzing at triple mystery, scarcely to be suspected by the average reader, and even those who revel in this class of story are not likely to guess at more than half the truth until close to the end, when the author is willing to permit suspicion. When such an author, whose reputation for fine workmanship has long been unchallenged, turns to whose reputation for fine workmanship has long been unchallenged, turns to the enlightenment provided by a sympathetic critic.

Amount the detective. There is a triple mystery, scarcely to be suspected by the average reader, and even those who revel in this class of story are not likely to guess at more than half the truth until close to the end, when the author is willing to permit suspicion. When such an author, whose reputation for fine workmanship has long been unchallenged, turns to something quite beyond the average.

What might be supposed to be a dry and uninteresting subject has been something quite beyond the average.

My Lady's Bargain. By Elizabeth acters soon become familiar and one is them far off, in the footsteps of Rich-Hope. New York and London: The interested in the varied and natural ard Harding Davis, the pioneer in this romantic country.

Tiger River. By Arthur O. Friel. New York and London: Harper & his contemporaries, and be regarded Brothers. \$1.90. This is a sequel to even today, as the greatest of the "The Pathless Trail" and, like most great Chinese poets. like him.' Other young men spoke of Rivers in the same tone. He was a thread of a strange and most fascination for of the first order to many. So we met at the Reform Club."

There is, of course, no dignity in such an opening. It is, if you like, vulgar. And the phrase, "of the first one of Cromwell's trusted of the protectorate. General country.

The story is closely packed, too closely packed, too closely perhaps, with material for a dozen novels, through amplifying the strung a series of thrilling adventures of the first book, which the was it seems, a sort of Francisco Franci

Hearn's Romance of Words

which go to make up what we call charm in literature are felicitiously united in the letters written by Lafcadio Hearn. One of these is a sense of intimate contact between writer and reader, such as one always finds in reading the personal letters of a man of genius; and another is a touch of the rare and exotic, something which for the time being transports.

which go to make up what we call understand its inscrutable people, and the always doubted his power to explain them. And yet to most of us he always doubted his power to explain them. And yet to most of us he little village of Yvorne. The streets are being swept, and the swish, streets are being street being swept, and the swish, streets are being swept, and the swish.

The streets are being swept, and the swish, streets are being swept, and the swish, streets are being swept, and the swish.

The streets are being swept, and the swish, streets are being sw which for the time being transports one to far-away lands.

Lafcadio, his unusual name is less romantic than the actual career of the He was born on one of the Ionian Islands (from which the name was derived), of an Irish father and a Greek mother. "Half these Greeks," he writes, "are mixed with Turks and Arabs. I don't know how much of an Oriental mixture I may have." And the life that followed was one of nomadic adventure. Going into journalism, he came to Cincinnati, then went to Martinique, to Philadelphia, and finally found his home in Japan, the country with which his name is now forever associated. He married a Japanese wife, and devoted his life to teaching English in the Japanese schools and universities and to literary

For a man of such varied circumstance we should expect something uncommon, and Hearn does not disappoint. His several volumes of literary criticism, embodying the substance of lectures to his students, are of a of lectures to his students, are to beautiful clarity which makes one wonder if every critic would not profit by an apprenticeship of teaching his own literature to foreign students. His books on Japan are justly mous, but most fascinating of all are his letters, with their light but sure touch on many subjects, revealing the writer's personality; unfolding, in the words of a critic, "the wide range of his mental excursions, his insatiable curiosity, the dignity and beauty of his character, the gradual deepening and purifying of the graver aspect

Hearn was in some ways the most lonely of men, and it is through his correspondence that he comes in touch with his own world. He had been cut off from most of his friends; the students he found unresponsive outwardly. His wife, whom he loved tenderly, was never able, because of difference of language and traditions. to share in his inmost thoughts. The lovely little letters that he writes to her are vastly pathetic, so like are they to the letters he might have written to a child. So, except for his intercourse with a few friends, he withdrew more and more into the world of art and books and his own

delightfully picturesque." And the happiness! The one that has said

The letters are not always of Japan; often he writes a criticism of the book are lightning flashes in that apocalyptic style of his which reveal infinite I read only for the flashes." And indeed Hearn's own style is one of flashes of penetration and intuition.

Most delicate are his bits of description. "European art does not seem to me to have ever caught the soul of snow as the Japanese art has -with its fantasticalities, its wizardisms." He has written a paper on dragon-files, which seem to have made a peculiar impression on his fancy; he describes a woman, "graceful as a tinkling of a crystal wind bell. Again "Oh, you must be happy today! The sunshine is whiter. Emerald and flies, are playing everywhere. All the shadows are sharp as the edge of a

One cannot read far without realizing that Hearn was a follower of the French school with its emphasis on "le mot juste." Time and again he writes of the arduousness of his labors. One of the most famous pasway in which he loved words. He is answering a criticism made of his tendency to introduce Japanese words into his English prose. "For me words have colour, form, character: They have faces, parts, manners, ges-

ticulations. . . . Because people can-not see the colour and tints of words cannot hear the whispering of words, the rustling procession of letters, the dream-flutes and dreamdrums which are thinly and weirdly played by words... Is that any reason why we should not try to make them hear, to make them see, to make them feel? . . . I write for the belovéd friends who can see colour in words, can smell the per-fume of syllables in blossom, can be shocked with the fine elfish electricity of words. And in the eternal order of things, words will eventually have

Sunday Morning in Yvorne

their rights recognized by the people.

The golden sun tells me it is morning. But it is very early, as the gentle stirs indigenous to Sunday in Switzerland have not as yet awakened. The streaming sun brings with it into my room the fragrance of a lilac bush outside the window, and venturing with this coy, shy scent is the bolder

A vote in the House of Commons, in which the British Government maintained its ascendancy by the narrow

The Rise of British Labor

majority of forty-eight, following as it does swiftly upon the loss of three parliamentary seats by the party in power, arouses some expectation of the early fall of the Bonar Law Government. The vote technically involved support of the civil service during the coming year. Actually it hinged upon approval or disapproval of the Cabinet's

or disapproval of the Cabinet's attitude of benevolent neutrality in the continental situation. The same eccentricities of procedure, which enable a United States Senator to discuss the propriety of opening the tomb of a bygone Egyptian King while nominally speaking on a motion concerning the ship subsidy, seems to find place in the House of Commons. The question being the support of the civil service, the debate turned wholly on the question as to whether Great Britain should intervene in behalf of Germany, or leave France to do her will

The Labor Party, now holding undisputed place as the Opposition, is naturally greatly encouraged by this and other recent political phenomena. In this vote it had the support of at least fifty Tory members dissatisfied with the foreign policy of the Government. As the Labor Party's policy is distinctly in favor of such intervention as will end the present situation in the Ruhr, with at least the hope of reviving the trade of Great Britain with Germany, the vote must be regarded as distinctly in approval of that policy. British opinion indeed, as reflected in the press and in politics, seems to be more strongly anti-French than that of the United States. To what extent this is due to economic pressure can only be roughly estimated. The unemployment question is allimportant in Great Britain, and naturally the Labor Party holds itself responsible for legislation which may correct that situation. The lack of German trade is reflected in the closing of factories and the multiplication of the number of the unemployed. Hence the attitude of Labor

In the United States public opinion is overwhelmingly favorable to France. It may be that this is due quite as much to economic conditions as is the situation in Great Britain, for unemployment has ceased to be an issue in the United States, and has in fact been largely replaced by lack of unskilled labor. In considering the situation in continental Europe, therefore, American opinion is largely influenced by sentimental consideration. It wishes to see economic peace restored and business return to normal, but in the main it holds that the claims of France are just, and that that Nation should not be impeded in her effort to enforce those claims. But so far as party politics is concerned, the issue on which in England the Government is likely to stand or fall has in the United States no place whatsoever.

When Mr. Bonar Law took office at Westminster it was with the assurance to the electorate that the Lloyd George policy of restless activity in all continental affairs would be abandoned. Tranquillity was to be the order of the day. That policy, which is very nearly parallel to that maintained in the United States, seems about to fall before the assaults of the Labor Party, which demands more active intervention. The London Chronicle, which reflects the sentiment of the Lloyd George element, says: "It is difficult not to ask oneself how long this country can safely continue with a Government too timid and halting to stand up in such a case for even our most elementary interests." This apparent espousal of the Labor cause by the former Premier's principal newspaper organ increased the very general expectation that Mr. Lloyd George himself may ultimately find place in the Labor Party.

Indeed, the opinion is apparently universal in England that the old Liberal Party has virtually ceased to exist; that it has become practically the right wing of the Labor Party. Many of its former most prominent public men and journalists make no secret of their affiliation with the organization of which Mr. Ramsay Macdonald is the head. To some extent this large infusion of Liberal blood and Liberal ideas makes that party less distinctively a Labor party than it was before. Whether or not its more radical qualities shall be thus obscured, only the history of the next few years can tell. It might conceivably be swallowed up by the flood of incoming Liberals, as twenty years ago the very promising People's Party in the United States was swallowed up when the Democrats made its issues their own. But as matters stand today in England, the Labor Party, though still in the minority, is the one political organization which seems to know what it wants, and is insistent upon the fulfillment of its desires. In a period when the public mind is obviously in revolt against quibbling, evasion, and "pussyfooting" of every sort, this attitude of clear understanding of purpose and determination to effect its ends may well make the Labor Party triumphant in England.

REMARKABLE success has attended the Boys' Parliament in Winnipeg, Canada, indicating a keen desire on

The Play
Parliament
in
Winnipeg

the part of the youth and citizens of Manitoba to further the development and training of Canada's future citizens. Occupying the thoughts of the boys thus with public questions and training them in government activities is, without doubt, leading them to consider their municipal and community duties of primary importance. The Boys'

primary importance. The Boys' Parliament, striking a careful balance between work and play, in reality deals with problems of vital importance to

the youth of the Dominion, while the opinions expressed by the boys themselves in debate before the House, on matters relating to their own welfare and advancement, may well serve to direct the policies of the men governing the affairs of the country through the medium of the provincial parliaments.

It is but natural, perhaps, that this play parliament should approach more nearly to the ideal than the regular legislatures, because it is free from their practical difficulties. The aim of those promoting the project was to increase interest in the Canadian Standard Efficiency Training, which in the past five years has done much to raise the status of Canada's youths, resulting in their taking a greater interest in community affairs and obtaining an enlarged point of view from every angle.

Courage, loyalty, integrity, prudence—these are qualities considered necessary for the youth qualified to be a leader in the Boys' Parliament. Surely even a "make believe" game such as this is, having as its foundation such firm characteristics, cannot help directing the thoughts and feet of the young boys toward the high goal of unselfish service for the best good of the greatest number.

READJUSTMENT of commercial relations through special treaties is the order of the day in Europe. Hardly

The Franco-Swiss Tariff Deadlock a week passes without the signature of a new trade treaty being announced. Thus there was recently signed a new commercial agreement between Italy and Switzerland. Between France and Switzerland there has arisen, on the other hand, a situation that is perhaps without precedent. It is of special interest at this time because it

is directly due to the new vogue of giving the voters greater control over international relations. As a substitute for the old "Free Zones" along the border, a new convention with certain reciprocity concessions was signed on Aug. 7, 1921. On March 29, 1922, it was ratified by the Swiss Federal Council, the vote being 85 to 76. On Feb. 2 of this year, upon the urgent request of the French Government, and despite protests from the Savoy deputies, it was also approved by the French Chamber of Deputies. But now Switzerland has a referendum system making its Government action subject to popular review, and on Feb. 18 the convention was rejected in a special election by a large majority. There the matter

In these negotiations a number of historical events have acquired a distinct news interest. A glance at the map will show that Geneva is situated in a sharp corner of Switzerland, nearly surrounded by French territory. In 1798, it was occupied by French troops, and during the First Empire it was the seat of the French Department of Leman. After the fall of Napoleon in 1815, it was restored to Switzerland, receiving at the same time free-trade rights with the adjoining French district of Gex, lying between the Jura Mountains and Lake Leman. The next year it acquired similar rights in the Savoy district to the south, which was not then French. These are the two "Small Zones" of which Geneva is the natural commercial center, and on which it, reciprocally, relies for food supplies.

Then there is the "Large Zone," consisting of the former Duchy of Savoy, to the inhabitants of which Napoleon III in 1860 granted special free-trade rights with the adjoining Canton of Geneva as an inducement to vote "Yes" in the plebiscite on the provisions of the Treaty of Turin transferring Savoy and Nice from the recently restored Kingdom of Italy to France. In this matter Switzerland has no treaty rights. It is a French domestic arrangement, and on Feb. 2, 1923, overriding the formal objections of 168 communes out of 203 in Savoy, the Chamber of Deputies voted, 424 against 7, to suppress this régime and to make the tariff line coincide with the frontier. As a recompense the Savoyards are to receive out of the duty revenues an annual allowance for public purposes during the next thirty years at the rate of forty francs per inhabitant, plus the number of Savoy soldiers who fell in the war.

What is going to happen next? Regardless of his preoccupation with the Ruhr, Premier Poincaré was present at all the "Free Zone" debates in the Chamber, and on Feb. 2 in his final appeal for a ratification he said:

Three years these negotiations have lasted. In the meantime the Convention of 1880, which regulated Franco-Swiss trade relations, has expired, so that if you repudiate this agreement we shall have nothing ahead of us tomorrow. That will mean a tariff war between France and Switzerland.

To a direct question by Deputy Borel of Savoy as to what he would do in case the Swiss people voted "No," he replied evasively.

Side by side with their masters, asking no questions, expecting no rewards, ready to serve, mankind's dumb friends, the adventuresome horse

In the

Industrial

Trenches

and the cautious mule, go with him willingly when he fares forth to achieve fortune and possibly fame in some untried undertaking. They go with him into war, they carry him and his camp upon expeditions into unexplored countries, and they toil with him when he delves and digs for the hidden treasures

stored away in the earth. Through deep snows, up and down rugged mountains, across scorching deserts and into deep swamps, the faithful animals lead or follow as they are directed.

And yet it is undeniable that in the heedless desire to profit as quickly and as greatly as possible, those whom these animals serve too often forget that something is due in return. But it is encouraging to know that because of recent disclosures regarding conditions in the oil fields in the southern sections of the United States, definite efforts are being made by representatives of

humane organizations to impress the wisdom, if not the necessity, of making provision for the care and comfort of animals used in the development of new wells and the transportation of their products.

In the State of Arkansas, for instance, where there has been great activity recently in opening producing wells, the first and most important problem to be solved is that of transportation. These new fields are frequently miles distant from a railroad, and often in sections where there are no roads of any kind. Machinery must be hauled in and the oil carted out. Thousands upon thousands of splendid horses and mules have been taken into these new fields to be used in drawing heavy loads over roads which at some seasons of the year are next to impassable. Pitiful stories have been told of abuses carelessly or wantonly inflicted upon these animals, and it is in an effort to alleviate them that courageous and unselfish men and women have enlisted to carry the gospel of kindness into the camps.

It is encouraging to note that there has been an awakening among those in authority in Arkansas to the necessity of immediate action. Already the effects are apparent. In one instance, at least, the Chamber of Commerce in the town nearest a new field has taken steps to build a highway over which heavy loads may be drawn with comparative ease. Humane societies have been formed, and special officers have been assigned to prevent cruelties and needless hardships. In the schools for both whites and Negroes, the children (and the teachers as well) are learning lessons of kindness and consideration. The simple text in these schools might be the Golden Rule. The lesson to be learned is that the rule should be applied impartially and universally. It works wonderfully in the animal kingdom.

WESTERN art ideals are assertive. While the citizens of Cody, Wyo., named for the famous scout and plains-

Buffalo Bill

Bronze

in -

man, "Buffalo Bill" (William F.) Cody, may not claim to know all that is known or all that may be learned regarding sculpture, they, like some critics of music or the other arts, admit with characteristic and possibly pardonable reluctance that they know what they like, and that they want only that. Knowing that they have a cherished mem-

ory of Buffalo Bill astride a western cayuse or Indian pony, they declare with some emphasis that they do not care to see him represented as mounted upon a horse of a type unknown in the west when Cody was winning fame.

They profess to admire the beautiful animal designed by Mrs. Harry Payne Whitney of New York, but insist that it is, if a true type, one of which they have no actual intimate knowledge. The thoroughbred seen on the race tracks and in the parks of eastern cities has had, at least until recently, no place on the prairies and in the foothills of the west, according to their view, and they do not hesitate to say that they disapprove of the effort to substitute what they call a misfit in furnishing, in enduring bronze, a mount for the hero of the trail.

It cannot be said that they are unappreciative or without their rights. They might as reasonably argue that it would be incongruous to provide, in the Sherman equestrian statue at the entrance to Central Park on Fifth Avenue in New York, or in the Washington statue in the Boston Public Garden, animals of a type distinctly different from those portrayed by the sculptors. There is an eternal fitness which must be conceded and observed. There must be a faithfulness of portrayal, as that follows a correct concept of the ideal to be represented.

To the easterner, even though he or she may be an admirer of the finer types of horses as they are seen in the east, the incongruity complained of by the good people of Cody would not at once be apparent. But the easterner would as quickly condemn the substitution in the case of the Washington or Sherman statues as the westerner objects to what to him is an inexcusable incongruity regarding the Buffalo Bill statue.

Editorial Notes

Worthy of the ideals of the Audubon Society is the campaign being launched by it to save the last of the flame-colored flamingoes, which once were numerous in the Bahamas and Florida. Even as recently as twenty years ago, there were some 12,000 of these birds, but it is estimated that today there are only a few more than 1000. With a view to having a sanctuary built for them on the Island of Andros, if the local government will lend him its co-operation, T. Gilbert Pearson, president of the National Association of Audubon Societies, has started on a trip to the Bahamas. It is to be hoped that he will be as successful in this undertaking as when establishing similar refuges for egrets and other birds elsewhere.

ESTABLISHMENT of a new world record of nearly 10,000 miles for long distance radio transmission, when messages sent from Troy, N. Y., were heard in New Zealand, involves a number of interesting side issues. For example, early spring in America is late fall in New Zealand. This means that although the broadcasting was done in the United States under favorable conditions, the radio waves passed through the torrid zone into a season of the worst climatic conditions possible for radio transmission. Human invention is having its day.

THAT newspapers should guard against false statements in their headlines is almost too trite for repetition, but every once in a while the point is forced to the forefront by an unusually aggravated instance. Thus, in The Baltimore (Md.) Sun recently was the caption: "Best People' Buy Stolen Whisky." Now no "best people" do anything of the sort. Some who like to consider themselves such may do so, but that does not make the statement in the least degree true.

Oxford-Without and Within

Spring—Oxford—lazy punts along the Cher—fields of buttercups and bits of woodland where the cuckoos sing—brilliant blazers—bicycles—Berkshire inns and tea and eggs and jam a-plenty! Precious little—save of academic romance—in all of that. Nor is that all. Toggerstime on the Thames—sort of a rough-house on the river—fills a week of mid-February; Oxford-Cambridge races early in March and the University is a-flutter; and in London—"Eights" week late in May, when it's

Parson, quit your lonely village;
Citizen, the smoky town;
Farmer, leave the fields and tillage,
Lawyer, doff that wig and gown!
Breathe once more the youth of Oxford
Where the punts serenely rock:
For the Eights are paddling, paddling,
Down away to Iffley Lock!
Keep her steady!
Turning, ready,
By the bend at Iffley Lock.

This—to the casual visitor—is Oxford, Oxford outside its college cloisters. And within them, all is not scholastic nor severe. Informal, inter-college breakfasting—an imposing meal, to say the least—critical discussions on a multitude of subjects from Shelley to the new lady undergraduates and the Government's Near Eastern policy; a few lectures scattered comfortably throughout the days; vacation periods—six weeks at Christmas and Easter and four months in the summer—in which a considerable part of the actual work of school is done—this is something of Oxford from within. From all of which one may be led to concede that the University is unique—academic Eden where study is a social function—an open fire, and good fellowship—and classes mere friendly chats with a kind and friendly tutor.

But there is more than this at Oxford—much more. A delightful book—"Oxford of Today," by Laurance A. Crosby and Frank Aydelotte—has just appeared in which all aspects of the university life are intimately revealed. Although the book is intended primarily as a manual for prospective Rhodes scholars, it is of more than ordinary interest for the average reader who enjoys good history, is interested in education, and desires, withal, to read of both in excellent English. The "more than this" which constitutes Oxford a university in the strict meaning of the word is brought out clearly in this book.

First of all, it is no ordinary man who "goes up" to Oxford, although some rather extraordinary men frequently are "sent down." Of some sixteen degrees toward which study at Oxford is generally directed, that of Bachelor of Arts is the most important and the most characteristic. But there are B. A. students and B. A. students: that is, those who group together in the Pass School, on the one hand, and those in the Honor Schools, on the other. There is one Pass School and there ten Honor Schools, including: Literae Humaniores (Classics); Mathematics; Natural Science; Jurisprudence; Modern History; Theology; Oriental Studies; English Language and Literature; Modern Languages; and Philosophy, Politics and Economics.

About one-fourth of the undergraduates are in the Pass School—the avowed purpose of which is to provide something of experience (nature not specified), self-culture, development, social life—and, as a harrowing afterthought—a certain amount of knowledge. The course includes those studies generally sought out by the average scholastically unambitious undergraduate in an American college of liberal arts. In Oxford, however, they are labeled and grouped.

The Honor Schools, on the other hand, are each more or less specialized in character and are vastly superior in the type of work they do. Preliminary to entering an Honor School two examinations are necessary—unless, as a graduate from an approved university the student receives Senior or Junior standing, the former excusing the student from both examinations and the latter from one.

The real heart and strength of the Oxford system is personal tuition of undergraduates by College Fellows and Tutors. The tutor is the undergraduate's "godfather." He directs his work, advises him in his reading, and in a weekly conference of an hour or more gives detailed attention—likewise detailed criticism—to the student's essay which embodies the reading he has been doing. The system is intensely individualistic and free from formality. There is—at Oxford—much advice but little compulsion.

The University examination system furnishes the real moral force behind the informal methods of undergraduate instruction at Oxford. In the Honor Schools the final examination stands at the end of the course and covers the work of two or three years. The standard and character of the examinations are such as to promote a thoroughness and accuracy in preparation and study which are often sadly wanting in American universities. The results of these examinations are published in the University and London press, and conspicuous success is held in high esteem throughout the University. The final Honor examinations in each school ordinarily consist of a number (eight or twelve) of three-hour written papers, given morning and afternoon on consecutive days. "Cramming" is thus made impossible and mastery essential. And-contrary to American custom-the examination paper usually contains twice as many questions as the student is expected to answer, so that his own preferences and special talents will be given ample opportunity to display themselves. + +

From the gloomy isolation of a generation long past there has come, of late, frequent references—in the British periodicals—of Oxford's American menace. Some three hundred men and women—from out the doubtful west—have invaded every department of the life of the University until Conservatism, looking down from its medieval towers, shudders and fumes, and forthwith clatters into print with the assertion that the institution is being Americanized. But this, doubtless, is but one of the many disturbances which come to those elderly folks who look askance at their youngers and fret that the world is

changing. Always, of course, for the worse.

In the Colleges of the University, however, there is little of this feeling. Americans—most of them Rhodes scholars—have entered into the life of the University. They have won academic distinction; have rowed on their college Eights; have won their "blue" in track; have been admitted to the most exclusive clubs; and during last year the Oxford Union—the University's most powerful and most popular organization—elected an American to its presidency. There is, on the part of the Americans at Oxford, a very real desire to take with them, when they return to the United States, something of the heritage of learning and of culture with which Oxford endows her sons—and daughters. It may be—and this we know to be presumption—that these same men, bringing to Oxford the breezy spirit of a young democracy, will make their own—if small—contribution to the richness of that heritage.
